

17th IASC GLOBAL CONFERENCE

LIMA

1-5 JULY 2019

XVII Biennial IASC-Conference ‘In Defense of the Commons: Challenges, Innovation and Action’ (Lima, July 1-5, 2019)

Call for papers, panels, videos, posters, and dialogues

Deadline: December 7, 2018

Pontificia Universidad Católica del Perú, Lima (PUCP) & Los Andes University, Bogotá, Colombia

The local organizers of the XVIIth Biennial Conference of the International Association for the Study of the Commons welcome abstracts for papers, panels, videos, and posters to be presented at this conference, to be held in Lima, Peru, from 1 to 5 July 2019. The meeting will be held in the PUCP’s Lima campus and will be hosted by both PUCP’s Faculty of Social Sciences, and the Department of Economics of the Universidad de los Andes (Bogotá, Colombia)

With the theme of the conference, ‘In Defense of the Commons: Challenges, Innovation and Action’, we intend to provide scholars, practitioners, and policy makers with a forum to debate the contemporary role of the commons in a globalized world. Analyzing issues such as climate change, ecosystem resilience, and sustainability through application of commons theory offers potential for finding alternative solutions. In light of growing economic and power inequalities, gender imbalances, and impending scarcity, there is a need to find ways to address these pressing challenges occurring around the globe.

The IASC 2019 global conference in Lima offers the prospect for the IASC to venture into a fascinating region of the world incorporating the Andes, the Amazon, and the Pacific, where many natural resources currently managed by ethnic communities are under threat from privatization and/or state appropriation. The region has a complex history of contestation over

land and other resources, combined with thriving social movements initiated by indigenous groups in relation to shared ownership and use.

The region incorporates a range of difficult issues for exploration, and will benefit from application of the rich multi-disciplinary views and experiences of IASC members who will attend from around the world.

We welcome proposals for workshops, round tables, panels, and dialogues that integrate practitioners, academics and other stakeholders.

We invite you to visit the conference website at <https://www.iasc2019.org> where you can learn about the conference timeline, keynote speakers, policy sessions, pre-conference master classes, field visits, and opportunities to organize your own project meetings at the conference. You can also find out about Lima, the 2019 conference venue, along with planned excursions, social events, and much more.

Keynote speakers

Prof. dr. Joan Martínez Alier (Universitat Autònoma de Barcelona)

Dr. Brigitte LG Babbiste (Alexander von Humboldt Center, Colombia)

Other keynotes are to be confirmed and will be announced in due time.

Conference tracks

1. Institutions and actions for the protection of the commons in the 21st century

This track will examine the conditions that enable and challenge collective action supportive of the commons in different contexts. Proposals could explore the following issues:

- The nature of distinct discourses, agendas, and experiences that enable a (re)focusing of society and economy towards greater sustainability and equity.
- The role of non-state actors in supporting the commons and the use of global initiatives to increase their resilience.
- The role of ethnic community proposals for socio-environmental justice in catalyzing regional and global movements.
- The influence of social movements in driving institutional change in defense of the commons, particularly in relation to legal and policy reforms affecting land tenure rights, shared knowledge, territorial titling, and self-determination.
- The growth of new economies that include holistic approaches in order to use business as force for change (such as BCorporations, grassroots business funds, inter alia).

2. Multilevel and polycentric governance

This track will focus on the relation between people, commons resources, the state, markets, and the role of sub-national governments. We invite proposals engaging with issues related to the interplay between: polycentric governance, the governance of global resources, the interplay of climate change and conservation policies, and the impact of interactions between local change and the future of global resources. We also welcome proposals on new economic strategies such as REDD and PES (payments for environmental services) as mechanisms to promote conservation and how these interact with the commons and community governance.

3. Challenging privatization: old and new urban commons

Conditions brought about by massive migration to cities generate new challenges for the studying of the commons, including urban agriculture, parks conservation, and the adequate provision of water and open spaces for recreation. In addition, proposals under this track may explore the commons in relation to the following topics: energy flows and materials in urban ecosystems, water and urban waste management, public spaces, gentrification, "environmental racism", environmental justice, popular epidemiology, green belts, and urban zoning.

4. Extractive industries and the commons on land and sea

This track deals with the growing material and economic flows of the world economy, the continuous expansion of the agro-industrial and extractive frontiers, and the challenges these pose for local commons (e.g. ecological distribution conflicts). Proposals under this sub-theme will explore the dynamics of exclusion, control, defense, and governance of commons in the context of the rollback of rights in favor of extractive investment.

Proposals will also engage with issues of power to explore issues such as:

- The relationship between uses of a commons resource and its boundaries;
- Boundary setting in relation to commons (who is involved in the nature of their roles);
- Opportunities and threats for commons created as a result of expansion of extractive industries;
- Current trends in the management of coastal resources, their benefits, and their challenges;
- The nature of coastal commons, and comparison with other forms of commons;
- Opportunities and challenges for the defense of the commons using hybrid state-market-communal arrangements (e.g. TURFs, management zones, fishing coops).

The panels under this track will explore the different kinds of conflicts and open violence that take place over the commons. Engagement is likely to include papers on inequality and conflict over commons, the role of civil conflicts and illegal economies, the impact on gender relationships, and the fragile position of environmental activists who are often threatened while defending natural resources.

5. Knowledge as commons and information technologies

This track explores the challenges and benefits of information technology in the defense and management of the commons, inviting discussions of whether technology empowers local communities or makes them more vulnerable to external control. Presentations will examine topics such as: the use of technology (e.g. social networks, drones, citizens' science, handheld technologies) for participatory monitoring; land demarcation; and, reporting on invasions and deforestation.

Issues of interest under this track include the following:

- Utilization of social network platforms such as Facebook, LinkedIn, Instagram and others in relation to the commons, and explorations of the issues, limitations and roles of social media tools.
- Technology as a 'game-changer' for ecosystem restoration.
- The potential utilization of artificial intelligence in relation to commons management and governance.

6. Alternatives to mainstream models of development: BuenVivir, Ecofeminism and Degrowth

This track will enable conference participants to examine alternative proposals to mainstream development practices and discourses. Panels will examine South American experiences and strategies for better livelihoods in relation to alternatives to development arising in other regions, such as de-growth and ecofeminism. Papers and presentations that explore and/or critique the future of the commons under alternative models are also welcomed.

7. Methods, disciplines, and models for studying the commons

This track will enable conference delegates to examine past and current methodological approaches applied to understanding the commons and assess their usefulness in today's world. Papers will analyze the role of economics as a key driver for political action in the commons, including exploration of different approaches such as experimental, ecological and resource economics, and political ecology. How economic approaches contrast with other complex-system, multi-level, transdisciplinary approaches will also be examined, in support of the effort to use the best available knowledge on the socio-ecological dynamics that govern commons resources.

Multi-stakeholder Dialogues

Building on the fruitful experience of the Practitioner's Labs in the previous IASC global conference (held in Utrecht in 2017), the Multi-stakeholder Dialogues will provide a unique platform for knowledge exchange across different social actors.

These 'dialogue' sessions are designed to be flexible and can take different formats (e.g., roundtable, workshop, living lab, open discussion, etc.). They will be structured around a particular question, or challenge, facing commons theory, practice, management or governance.

The key features of the 'dialogues' will be the relevance of the challenge / question tackled and its composition: they must be composed of at least two different types of commons-related stakeholder (e.g. citizen, practitioner, indigenous peoples' organizations representatives, private sector, public sector, policy maker, academic researcher, local communities activist). Those proposing 'dialogue' sessions will need to develop a coherent description of the proposed sessions, the aims and objectives, and identify the range and types of stakeholders involved. Multi-stakeholder Dialogue proposals will need to include:

- 1) a brief explanation of the societal relevance of the main topic and the Dialogue format (e.g. roundtable, workshop, discussion, etc.);
- 2) a list of the participants (at least two different categories of stakeholder – with the ideal being three or more) and their expected contribution;
- 3) a description of how knowledge exchange and/or co-production will be promoted during the session (how are you thinking to engage participants on a co-production of knowledge? how are you planning to synthesize the discussion?).

Submission guidelines

All abstracts should be submitted via <https://www.iasc2019.org/abstract/>

1. Abstracts for Posters, individual papers (including those submitted under a panel session)

- All individual paper and poster proposals should be in English (both US and UK styles are allowed); proposals for panels, panel-related papers and multi-stakeholder dialogues can also be submitted in Spanish or Portuguese, provided that one of the participants will be able to translate into English during discussions.
- The text of your abstract should be no longer than 500 words (including references) and entered as flat-text via the online registration procedure on or before **December 7, 2018** at the latest
- Panel-related papers should be submitted **only after the submission** of the related panel and **should include the panel ID** (available from panel organizers) as first keyword
- Please also submit relevant keywords regarding topics, region, and time period in the registration system
- All abstracts will be peer-reviewed by at least two selected reviewers
- You will be notified about the review no later than 31 January 2019
- Posters are expected to be submitted no later than 20 June 2019
- Full papers submissions are welcome but not mandatory. Please note that by submitting your paper, you agree to have the paper to be included into the Digital Library on the Commons [<https://dlc.dlib.indiana.edu/dlc/>]

2. Panel Proposals

Those intending to **submit a panel proposal** (consisting of 4 papers), must note the following **additional requirements**:

- The main organizer of the panel **must first submit a panel proposal** with an abstract on the session's content. The panel will then be given a Panel ID (via a confirmation email). Organizers of Panel sessions must plan ahead to include this step.
- The main organizer of the panel must then provide each of the authors of the 4 papers with the Panel ID number. Papers intended for panels cannot be submitted without a Panel ID number that links the paper to a specific panel.
- Panels are only considered if all 4 paper proposals are also individually submitted by their authors, including the panel ID number. It is the responsibility of the panel organizer to inform the authors of the participating papers about this procedure.

Acceptance of Panel sessions:

- Panels will only be included in the program if at least three individual papers are accepted by the reviewers, **and** only if all authors have registered **by 15 May 2019**.
- If panel is accepted but not all authors have registered in time, the organizers will allocate the papers of registered authors to other panels, if this is possible.

3. Multi-stakeholder Dialogues

- Those intending to submit a Multi-stakeholder Dialogue proposal must note the following requirements:
 - The main organizer of the dialogue must first submit a proposal with a 500 word abstract on the session's content and identifying the key types of stakeholder involved. The Dialogue will then be given a Dialogue ID (via a confirmation email). Organizers of Dialogue sessions must plan ahead to include this step.
 - If accepted, the main organizer of the Dialogue must then submit a detailed 1,000 word description identifying the following:
 - o The format of the dialogue (i.e. round-table, workshop, world-café, etc.);
 - o The aims and objectives of the Dialogue, and how these will be achieved;
 - o Names of stakeholders involved, their organizational affiliation, and their role in the Dialogue;
 - o Planned outcomes
- Dialogues will be reviewed by a joint panel of academics and practitioners.

Acceptance of Dialogue sessions:

Dialogues will only be included in the program if the overall proposal is accepted by the reviewing panel, and only if all named and involved stakeholders have registered **by 15 May 2019**.

Please also note that....

- The conference is open to practitioners, scholars, or any other interested parties to attend without presenting a paper. We welcome all those with an interest in commons issues.
- If you work together with scholars studying the commons, we encourage you to consider coordinating with them to submit a Multi-Stakeholder Dialogue, or a Panel proposal (please see instructions above).
- For practitioners interested in presenting their initiative/organization to other delegates at the conference, a special "Call for Practitioner Events" will be issued in the fall of 2018, giving you the opportunity to present and to engage with the academic debate.

Conference Fees and Grants

Conference Fees

Conference fees will be announced via the conference website www.iasc2019.org in the fall of 2018 and will be income-dependent, but they will also be **substantially lower for members of the IASC**. Register now as IASC-member via <https://membership.iasc-commons.org> and start benefiting right away from your IASC-membership.

Grant Support

Depending on funding available from donors, there will be a number of grants available to delegates from the Global South and to PhD-students, which will provide support for attending the conference. Authors of accepted abstracts will receive notice before 31 January 2019 explaining the application procedure for a grant.

Questions?

Get in touch with the conference organizers: iasc2019@iasc2019.org. If you wish to be updated about the IASC-conference and other IASC-events, please register for the IASC-newsletter via <https://www.iasc-commons.org/newsletter/>

We are looking forward to see you in Lima!

General Organizing Committee

Juan Camilo Cardenas	Conference Co-chair (Universidad de los Andes, Colombia).
Deborah Delgado	Conference Co-chair (Pontificia Universidad Católica del Perú)
Jose Carlos Silva	(Pontificia Universidad Católica del Perú)
John Powell	IASC President (University of Gloucestershire, UK)
Marco Janssen	IASC President-Elect (Arizona State University, USA).
Anne Larson	(CIFOR, Peru)
Maria Alejandra Velez	(Universidad de los Andes, Colombia)
Ivan Lobo	(Universidad de los Andes, Colombia)
Leticia Merino	(UNAM, Mexico)
Katharine N. Farrell	(Humboldt-Universität zu Berlin)
Xavier Basurto	(Duke University, USA)
Gabriela Lichtenstein	(CONICET, INAPL, Argentina)
