July 1-5, 2019  
Lima, Perú**

**program**

# Preface

Dear participants,

The organizing committee is very pleased to welcome you to the XVII Biennial IASC Conference in Lima, Peru. As in previous IASC conferences, you will be participating in a meeting that brings together people and organizations interested in exchanging their ideas, studies, experiences, and leadership regarding the commons around the world.

Fifteen years after the successful 2004 conference in Oaxaca, Mexico, IASC is returning to Latin America. IASC 2019 has considerable participation by community leaders from the region, researchers and initiatives from civil society, all interested in engaging with the IASC community. This is a first for some participants, including several indigenous leaders who come to share their experiences in the representation of communities with self-governing systems of management in the Andes and Amazon.

The history of the commons in Latin America is closely tied to the region's biological and cultural diversity. This is one of the most inequitable regions of the world, albeit rich in natural and cultural capital. The abundance of non-renewable resources, coupled with a history of mining in the middle of water-rich ecosystems, has created great challenges for communities and governments to maintain their cultural and ecological wealth. A rich literature in the social sciences documents the history of resistance and struggle of indigenous, local and Afro-descendant communities who have occupied, lost and regained territories during the five hundred years since the first sustained encounter between Europe and the Americas. These historical processes have shaped cultures and ecosystems. The demographic transition has also increased interest in the urban commons, as vast numbers of people moved from the countryside to cities escaping their economic poverty.

Our conference brings together around 500 registered participants, from almost 50 countries, with the United States, Peru, Brazil, India, and Colombia having the highest representation. We expect that the conference will lead to a growth in IASC membership from Latin America and that it will begin a wider dialogue between scholars and practitioners from the Caribbean, Central and South America with the rest of the world.

IASC 2019 brings new and old ideas around the challenges to design the best possible commons to sustain livelihoods and ecosystems. The conference will include panel discussions on payments for ecosystem services, such as REDD; a focus on water, which continues to be a major concern for communities worldwide; forests, fisheries and biodiversity conservation. Gender analysis will play a key role in many of the conference's sessions, offering different approaches to how women and women's organizations respond to long-standing challenges now on a deep transformation.

The program not only includes parallel academic sessions, but also multi-stakeholder dialogues (MSDs) where practitioners, community leaders and researchers will come together to have conversations exploring issues that transcend the scholarly arena. A number of policy dialogues will bring authorities, policymakers, and researchers together to discuss the challenges of implementing policies in regards to rural and urban communities and ecosystems.

As in past IASC gatherings, there will be several pre-conference workshops, including two in Spanish aimed at a Spanish-speaking audience. These workshops include an introduction to the commons; behavioral and experimental tools; links between world-famous Peruvian gastronomy and the use of agrobiodiversity; and training in analytical tools, such as agent-based modeling and GIS analysis.

Several excursions have been organized that will give participants an opportunity to learn more about Peru, one of the most culturally rich and biologically diverse countries. In urban, suburban and rural areas, participants who register for these excursions will observe the results of the fusion of cultures and landscapes that characterize this country in its mix of Andean, coastal and migrant populations, as well as the many challenges towards protecting its natural and cultural wealth.

We want to acknowledge the sponsorship and financial support of the Bicentenario Special Project, the National Fund for Scientific, Technological and Technological Innovation Development (Fondecyt), the German Cooperation Agency, the Konrad Adenauer and Hans Stiegel Foundations for their support.

We celebrate the collaboration of two leading universities in Latin America: the Universidad de Los Andes in Colombia and the Pontificia Universidad Católica del Perú, who will host the conference. These two institutions have a wealth of accumulated research in the social and ecological topics surrounding the conservation and management of the commons, particularly of indigenous and Afro-descendent communities.

We hope that this IASC Biennial Conference continues to enhance knowledge and ties within a global community who are deeply interested in making the commons a part of a transition to a more sustainable and fairer world.

¡Bienvenidos!  
IASC 2019 Team

IASC 2019 Team

# Welcome

**DEBORAH DELGADO - Conference Co-Chair**

2019 is an important year for the commons in Latin America and Peru. This year marks the 30th anniversary of the adoption of the ILO Convention concerning Indigenous and Tribal Peoples, where 14 out of its 22 signatory states are from Latin America. The Convention recognized indigenous peoples' collective rights in the international arena. In Peru, we are also celebrating the 50th anniversary of the Agrarian Reform, which recognized collective land tenure rights for peasant and indigenous communities. These were

important steps towards giving political recognition to collective institutions. However, today the commons face bigger challenges as global change accelerates and the climate crisis deepens, decimating non-human species. Are collective institutions strong enough to face the challenges ahead? How will they cope with global environmental change and the pressure placed by industries on shared space? Orienting ourselves toward a more democratic and just arrangement, with a place for humans and non-humans, is a pressing task. We would like to welcome you to Lima to share your experiences, findings and ideas on how to create, manage and defend common practices today. We hope you feel at home and enjoy what Lima and IASC2019 has prepared for you.

**JUAN CAMILO CÁRDENAS - Conference Co-Chair**

I vividly recall our conversations around 2000 with Elinor Ostrom, who showed concern over the under representation of Latin America in initiatives such as IASC or IFRI (International Forestry Resources and Institutions) both of which she helped to create. She was very aware of the importance the commons approach could play in understanding the dynamics of governance of natural resources in this region, given the reigning discourse of a simplistic pendulum between the market and the state as

only approaches to public and social dilemmas. In fact, it took ten years for a Spanish edition of *Governing the Commons* to be published, thanks to the hard work of Leticia Merino, one of those pioneers of the commons approach in the region. Over the last thirty years, and coming from a few seeds of work by scholars in Mexico, Brazil, Bolivia and Colombia, there has been a growing interest in studying the Latin American commons, through the combination of tools and disciplines, which Ostrom always promoted. It is an honor and a delight to see this conference bringing the IASC community to Peru, a wonderful country that has much to share for the rest of the world on this regard. In a partnership with the Pontificia Universidad Católica del Perú, the Universidad de Los Andes (Colombia) is proud to co-organize this new IASC conference. Our work at Los Andes has been characterized by interdisciplinarity and pertinence, particularly considering that 35% of the Colombian territory has been formally titled as collective property to indigenous and afro-colombian communities. Sharing these experiences should create a stronger and richer IASC for all.

**PATRICIA RUIZ-BRAVO - Dean of the Faculty of Social Sciences**

As Dean of the Faculty of Social Sciences, it is a pleasure to welcome you to the XVII Biennial Conference of the International Association for the Study of Commons. This year our Faculty celebrates its 55th anniversary. During this time, our work has been characterized by our social and political commitment to the development of knowledge on the Peruvian society and its complexities. The debate on the commons and collective action developed initially by Elinor

Ostrom is undoubtedly an important field that allows not only to generate important knowledge and raise awareness for the just and balanced existence on the planet, but also to think about the application of knowledge from communal and autonomous initiatives, as well as public policies. In the region, as well as in our country, social and collective-based organizations have shown the greatest commitment to taking care of the commons. We still have a lot to do from academia and the public sector to strengthen these initiatives. It is significant that, as we welcome the global meeting of the commons in our country during 2019, we commemorate the 10th year anniversary of the Baguazo, one of the most recent and significant events of repression of the social organizations that defend the commons. In this scenario, having an event like this at home commits us to further our efforts in developing this line of work.

**MARCO JANSSEN - President And Regional Iasc Coordinator For North-America**

On behalf of the IASC Council I would like to welcome you to Lima. Like previous IASC conferences this one builds on the local context and experiences of people managing their shared resources. IASC 2019 focuses on the challenges and opportunities faced by the commons in a globalizing world. The rich environment in South America experiences tensions between extractive development and traditional and indigenous governance of shared resources. The conference

provides an opportunity to compare those challenges with case studies from other parts of the world. The conference also provides an opportunity as an organization to meet and discuss. Thirty years ago the IASC was established, and the Commons perspective is now more important than ever. The spread of concepts of self-governance of shared resources to urban commons, digital environment, health care, science and education provides new opportunities for research and outreach to new communities. During the conference we will have a number of lunch meetings for IASC members where we will discuss what we have done and what the next steps might be. Even if you are not yet a member, I encourage you to attend and participate in the future direction of the IASC.

# The International Associations for the Study of the Commons (IASC)

**The International Association for the Study of the Commons**

## History

The IASC was established as the International Association for the Study of Common Property in 1989 by a group of scholars, one of which was Elinor Ostrom (1933-2012), 2009 Nobel Prize in Economics laureate. The interdisciplinary group of founders included political scientists, anthropologists, economists, historians, and natural resource managers who before cooperated within the so-called Common Property Network, which started in 1984. In 1989 it was decided to broaden the scope of the association and hence also change the name to the International Association for the Study of the Commons.

## Mission Statement

The IASC is devoted to bringing together interdisciplinary researchers, practitioners, and policy makers for the purpose of fostering better understandings, improvements, and sustainable solutions for environmental, electronic, and any other type of shared resource that is a commons or common-pool resource. IASC's main goals are (a) to encourage exchange of knowledge among diverse disciplines, areas, and resource types, (b) to foster mutual exchange of scholarship and practical experience, and (c) to promote appropriate institutional design.

To achieve this, the IASC strives to promote intellectual exchange on policy applications and commons, issues through organizing global, regional, and thematic conferences, publication of *The Commons Digest* and the *International Journal of the Commons*, and by creating knowledge hubs and networks of scholars and practitioners involved in commons' issues, as well as fostering interdisciplinary discussions and the production of scholarly, applied, and policy-oriented publications.

## Organization And Memberships

The IASC is formally a US-based 501(c)3 non-profit organization with its official seat in Bloomington, in USA. The secretariat is hosted by the Research Team Institutions for Collective action and Institutions for Open Societies of Utrecht University. The association is governed by an elected international Executive Council and the Executive Director of the IASC. The IASC is a member-driven organization, currently comprised of about 400 members, both individual and institutional members. Membership (the cost of which is wage dependent) offers members numerous benefits, such as reduced conference participation fees, access to knowledge resources made available via the IASC, publication fees, discounts with the *International Journal of the Commons*, and the opportunity to announce events, job openings, publications, etc. via IASC newsletters and social media. Read more about membership, or even better, become a member via <https://iasc-commons.org/membership/>

# Elinor Ostrom Award

ELINOR OSTROM  
AWARD

"TRUST IS THE MOST IMPORTANT RESOURCE." ~E. OSTROM

At the IASC2019 Conference, the 2019 Elinor Ostrom Award on the Collective Governance of Commons will be awarded in three categories: senior scholar, young scholar, and practitioner. The Award was created in 2012 in honor of Elinor Ostrom (1933-2012), an exceptional academic who, throughout her career, challenged the conventional vision of individuals who act only as rational utility-

maximizers and are neither able to cooperate, nor to create, own, or use collective goods sustainably, except under external authoritarian rule or by dividing those goods into small units and privatizing them. By demonstrating that collaboration is possible, frequent, and occurs among individuals of different rationalities and in different contexts, Ostrom promoted a paradigm shift in political science and economics, as well as in behavioral and social sciences in general. *For more info, visit <http://elinorostromaward.org/>.*

The laureates will receive their awards during the conference dinner on Tuesday July 2nd, and will have the opportunity to deliver short lectures during the lunch on Wednesday, July 3rd that will be held at the Auditorium of the Faculty of Social Sciences from 12:00-13:30.

# General Organizing Committee

**Juan Camilo Cárdenas** (Conference Chairs)

**Professor of Economics, Universidad de los Andes in Colombia**

Juan Camilo Cárdenas is Professor of Economics at the Universidad de los Andes in Colombia. His work focuses on the analysis and design of institutions (rules of the game) that promote cooperation among individuals, and the solution of social dilemmas in the most fair, efficient, equitable, democratic and sustainable manner possible.

**Deborah Delgado Pugley** (Conference Chairs)

**Professor and Researcher of Sociology, Pontifical Catholic University of Peru**

Deborah Delgado Pugley is Research Professor of Sociology at the Pontifical Catholic University of Peru. Her research focuses on global environmental politics, sustainable development and socio-environmental issues at the community level. Recent projects include the impact assessment of oil spills in amazonian communities, subnational climate politics, and local universities involvement in climate politics.

**Jose-Carlos Silva-Macher**

Professor, Department of Economics, Pontifical Catholic University of Peru

**John Powell**

Senior Research Fellow, Countryside and Community Research Centre, Gloucestershire University, UK

**Marco A. Janssen**

Professor, School of Sustainability and Director of the Center for Behavior, Institutions and the Environment, Arizona State University, USA

**Anne Larson**

Principal Scientist, Center for International Forestry Research, Peru.

**Maria Alejandra Velez**

Associate Professor, School of Management, Universidad de los Andes, Colombia

**Ivan D. Lobo**

Former Lecturer, School of Management, Universidad de los Andes, Colombia. PhD Candidate in Political Ecology, University College London, UK.

**Cathy Rubiños**

Assistant Professor, Universidad Del Pacífico, Peru.

**Gabriela Lichtenstein**

Regional IASC Coordinator for Latin America and IUCN's Regional Vice-Chair for Meso and South America. Independent Researcher, National Research Council (CONICET), Argentina

**Juan Pablo Sarmiento Barletti**

Researcher, Center for International Forestry Research, Peru.

**Katharine N. Farrell**

Visiting Professor, Universidad del Magdalena, Colombia

**Leticia Merino**

Researcher and Professor, Universidad Nacional Autónoma de México.

**Xavier Basurto**

Associate Professor of Sustainability Science, Nicholas School of the Environment, Duke University, USA.

## Advisory Board

**Patricia Ruiz Bravo**

Dean of the Faculty of Social Sciences, Pontifical Catholic University of Peru

**Jorge Aragón**

Professor of Political Science Studies, Pontifical Catholic University of Peru

**Ismael Muñoz**

Coordinator Department of Economics, Pontifical Catholic University of Peru

## IASC Secretariat

**René van Weeren**

Executive Director, International Association or the Study of the Commons

## Support staff

**Lucía Pezo Alvarez**

Sociologist, Pontifical Catholic University of Peru

**Marisol Arestegui**

Sociologist, Pontifical Catholic University of Peru

**Tania Ramírez Farias**

MA in Environmental Development, Pontifical Catholic University of Peru

**Valentina Berardinelli Garzón**

MA in Human Development, Universidad Nacional de Colombia

**Dayan Ghuys**

MA in Population and Development Studies, Université Catholique de Louvain, Belgium.

**Claudia Durango**

Communications Officer, Pontifical Catholic University of Peru

**Diana Carolina León**

M.Sc. Economics, Universidad de los Andes, Colombia.

# Sponsors

**SOSTENIBILIDAD**

**BICENTENARIO  
PERÚ 2021**

## Bicentenario Perú 2021

Is a Special Project of the Peruvian State in charge of organizing, aligning and disseminating the activities carried out in relation to the 200th anniversary of Peru's independence. Peru's Bicentennial of Independence is a unique opportunity to imagine, construct and celebrate the country we want to be. The build up to such

a significant commemoration generates opportunities and favorable conditions for the strengthening of national identity and the construction of the civic values that allow us to face as individuals, nation and State the national and global challenges from the third decade of the 21st century. Facing the Bicentennial, Peru recognizes its mega-diversity as a central value of our identity. The conservation of the environment is a cross-citizen value, instilled from childhood and approached in an intersectoral manner from the government.

**CONCYTEC**  
CONSEJO NACIONAL DE CIENCIA,  
TECNOLOGÍA E INNOVACIÓN TECNOLÓGICA

## Consejo Nacional de Ciencia, Tecnología e Innovación Tecnológica (CONCYTEC)

Is a governmental institution composed by academics, the public research institutes and organizations, and civil society. Its principal aim is to regulate, direct, guide, encourage, coordinate, monitor and evaluate the actions of the State in the field of Science, Technology and Technological Innovation. They seek to promote

the different individual and collective capacities for the generation of scientific and technological knowledge through research and knowledge.

**Hanns  
Seidel  
Stiftung**

## The Hanns Seidel Foundation

Is a German political foundation that has worked in Peru since 1995. The Foundation is committed to the consolidation of democracy, good governance policies and ongoing development projects in Peru through three lines of work: youth political education, promotion of democracy and institutional strengthening, and promotion of civil society participation. The Center for International

Forestry Research (CIFOR) advances human well-being, equity and environmental integrity by conducting innovative research, developing partners' capacity, and actively engaging in dialogue with all stakeholders to inform policies and practices that affect forests and people. CIFOR is a CGIAR Research Center, and leads the CGIAR Research Program on Forests, Trees and Agroforestry (FTA). Its Latin American hub is based in Lima, Peru.

## The Konrad Adenauer Foundation (KAS)

Is a German political foundation in charge of over 200 projects in more than 120 countries. Its civic education programs aim at promoting freedom and liberty, peace, and justice. The Foundation

places much importance on Energy Security and Climate Change for the structure and maintenance of a democratic social order. In this context, the Foundation's Regional Programme Energy Security and Climate Change in Latin America (EKLA) of the KAS, has been designed as a dialogue platform, in order to provide impetus for political decision-making processes.

Implementada por  
**giz** Deutsche Gesellschaft für Internationale Zusammenarbeit (GIZ) GmbH

## Deutsche Gesellschaft Für Internationale Zusammenarbeit (GIZ)

The Contribution to the Environmental Objectives of Peru (ProAmbiente II) program is a joint initiative between entities of the Peruvian government and the German development

cooperation, implemented by the Deutsche Gesellschaft für Internationale Zusammenarbeit (GIZ) GmbH. The program aims to improve environmental governance and management, the conservation and sustainable use of biodiversity, and sustainable forest management. Partner institutions are the Ministry of Environment (MINAM) and its subordinate authorities OEFA - environmental assessment and enforcement -, SENACE- environmental certification - and SENARP- protected areas -, the Ministry of Agriculture (MINAGRI) and its affiliate Serfor - forestry service -, the Ministry of Economy and Finance (MEF), the Ministry of Production (Produce) and the Agency for the Supervision of Forest Resources (OSINFOR).

## Center For International Forestry Research (CIFOR)

advances human well-being, equity and environmental integrity by conducting innovative research, developing partners' capacity, and actively engaging in dialogue with all stakeholders to inform policies and practices that affect forests and people. CIFOR is a CGIAR

Research Center, and leads the CGIAR Research Program on Forests, Trees and Agroforestry (FTA). Its headquarters are in Bogor, Indonesia, with offices in Nairobi, Kenya, Yaounde, Cameroon, Bonn, Germany and Lima, Peru

# Partners

We would like to thank the following partners that make this conference possible. Their collaboration in parallel activities and excursions was key for the success of this week.

## **Lugar De La Memoria, Tolerancia E Inclusión Social (LUM)**

is a learning, reflection and discussion memorial about a period of extreme violence in the country's history, between 1980 and 2000, held by the Peruvian government.

## **Escuela de Gobierno y Políticas Públicas (PUCP)**

is dedicated to applied research and specialized postgraduate training and continuing education for public sector actors, state executives and public servants of the three levels of the State; researchers and political analysts; as well as professionals from civil society and the private sector linked to government affairs. It emphasizes the study of public policies and public management, of comparative political institutions and processes, and of international relations.

## **Dirección Académica de Responsabilidad Social (DARS)**

Is responsible for designing, promoting and fulfilling the University's initiatives of Social Responsibility. Its main objective is to identify and generate the conditions so that students, teachers and administrative staff have the necessary support to integrate training, research and action in the design and execution of initiatives and socially relevant projects.

## **Instituto de Ciencias de la Naturaleza, Territorio y Energías Renovables (INTE)**

manages research, academic training on ecological, socio-environmental, biodiversity, territory and renewable energies. Their principal aim is to connect the potential and specific needs of territories and societies through the generation of knowledge, information and academic quality solutions through our affiliated research centers and groups, projects, consultancies and inter-institutional agreements.

## **Centro de Investigaciones Sociológicas, Económicas, Políticas y Antropológicas (CISEPA)**

The Center for Sociological, Economic, Political and Anthropological Research (CISEPA) is part of the Faculty of Social Sciences and the Departments of Social Sciences and Economics of the Pontifical Catholic University of Peru. Since our foundation, in 1966, we have combined the academic and interdisciplinary approach to contribute to the knowledge of the national reality and to the design and evaluation of social policies. We continue to build capacities through our School of Researchers and share research results to influence public opinion and contribute to the debate

We would like to thank the following partners for their engagement in organizing excursions for this IASC2019 Conference:

### **Conservación Amazónica (ACCA)**

Is a Peruvian non-profit organization that brings together science, innovation and community to protect the western Amazon—the greatest wild area on earth. ACCA's activities over almost 20 years have focused on three strategies: protecting wild places that are home to hundreds of thousands of wildlife species; employing the latest findings in science and technology into the field of conservation; and empowering local people to become champions for conservation while improving their quality of life.

### **Conservation International (CI)**

Established in 1987, is a non-profit organization working in over 30 countries around the world, and in Peru since 1989. They believe people depend on nature for a stable climate, clean air and water, food security, cultural resources, and other benefits that nature provides. Building upon a strong foundation of science, partnership and field demonstration, CI empowers societies to responsibly and sustainably care for nature and our global biodiversity, for the well-being of humanity.

### **Asociación Circuito Ecoturístico Lomas de Paraíso**

This is a non-profit association, formed by neighbors of the A.H. of Manantial, Bellavista, Quebrada Alta de Paraíso whose objective is to promote the protection and conservation of the fragile ecosystem of Lomas de Paraíso through reforestation, irrigation, environmental education and ecotourism activities. The members of the association, neighbors of the area, coordinate with local authorities on issues such as: articulation with different institutions, approval of ordinances for the protection of the Hills, and the streamlining of procedures for the recovery of hilly spaces.

### **PNUD Lomas**

The Lomas EbA project, named for using the Ecosystem-based Adaptation (EbA) approach, seeks to protect, conserve and sustainably manage the Lima fog oases (lomas ecosystems). They work with local, regional and national stakeholders to strengthen capacities and improve the legal framework for ecosystem management. Thus, they promote replicas in other fog oases areas.

### **Reserva Nacional de Paracas**

The Paracas National Park is one of the few Natural Protected Areas (ANP, after its Spanish initials) that preserve Peru's coastal marine ecosystems. The Park covers a large part of the Paracas desert, islands and the sea. Besides protecting great biological diversity, the Park also contains various archaeological sites from the Paracas pre-Inca culture.

### **Círculo Ciclista Protector de las Huacas (CCPH)**

The Círculo Ciclista Protector de las Huacas (CCPH) (Circle Cyclist Protector of the Huacas) seeks to promote the use of bicycles as a means of transport and contribute to the revaluation of Peru's tangible and intangible heritage. They do this by making the participant identify with the problems of their heritage, and encourage them to take action in the protection of these spaces.

## **Comunidad indígena de Cantagallo**

They arrived in Lima from Ucayali from 1990 to 2000, and constitute the first native urban community in Peru (according to the criteria of the Agreement N° 169 of the OIT to identify to indigenous population). Its members maintain their language, art, knowledge and internal rules regarding coexistence. In addition, they identify themselves as an indigenous community, affirming their identity as the Shipibo-Konibo people. On the morning of November 4, 2016, a large-scale fire broke out in the community of Cantagallo, affecting 436 homes and 2038 people. Currently, part of the community lives in Campoy, and others in the vicinity of Cantagallo, given that the process of rebuilding their community still has not started.

# About the city of Lima

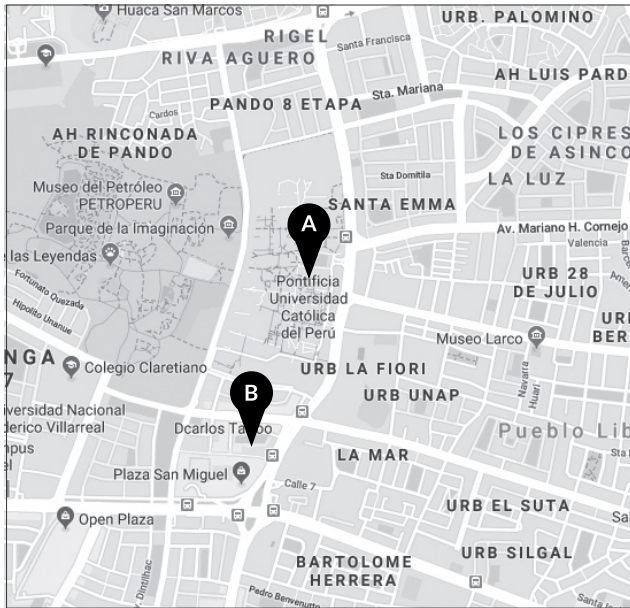

Peru stands out for being a multicultural and biodiverse country. It has three official languages, forty-four Amazonic languages and four Andean languages. We are recognized for our great variety in flora and fauna related to the existence of around ninety-six ecological zones, grouped into eight large natural regions. Also, our agricultural biodiversity is important with more than five thousand varieties of potatoes. The fusion of diversity, techniques and cultures through the centuries has forged Peruvian identity.

Lima is the eclectic Peruvian capital. It bewitches visitors with its bay, a past of diverse roots and a long-lasting cuisine that permeates every corner. It was founded in 1535 and it is Peru's capital and largest city. The city is located in the central coastal part of the country, overlooking the Pacific Ocean. This makes it the only South American capital with access to the sea.

The city has physical evidence of its pre-Inca past (locally known as huacas) and is only hours away from major archaeological sites such as Pachacamac which was the main sanctuary of the Peruvian central coast for more than a thousand years, the archaeological complex Rupac known as the Macchu Picchu of Lima and the sacred city of Caral which is the oldest civilization in the Americas.

Tradition and modernity coexist in Lima. The Spanish colonial establishment of the viceroyalty in Lima transformed the city into South America's main political and administrative center. During this period, residents built traditional churches, monasteries, mansions and balconies leading to the designation of its Historic Center as a UNESCO World Heritage Site in 1991.

# Conference Venues

**A** **Campus PUCP**  
Universitaria  
Avenue 1801,  
San Miguel

**B** **CC. Plaza San Miguel**  
Junction of  
Universitaria and  
La Marina Avenues

## Pontifical Catholic University Of Peru (PUPC)

The central venue of 2019 IASC Conference is the Pontifical Catholic University of Peru, established in 1917.

The Faculty of Social Sciences was founded in 1964 with the aim to teach and research the social, economic, cultural and political challenges of Peruvian society.

The Auditorium of the Law School of the PUCP will host the Opening Ceremony and Wrays Perez's Keynote lecture on Tuesday 02.

During the conference, most of the parallel sessions will be hosted at the "Complejo de Innovación Académica" also known as Aulario or Pabellón A (Pavilion - A).

The Book Fair will take place on the first floor of this venue in Room A-100.

Another important venue at the PUCP is the building "Nuevo Complejo", better known by the name of Edificio de Ciencias Sociales and is located at the Faculty of Social Sciences. This place will host the Policy Dialogues on Tuesday 02, Wednesday 03 and Friday 05 at the Multipurpose Room (SUM, after the Spanish initials) located on the ground floor of the building.

## **Lugar De La Memoria, La Tolerancia Y La Inclusión Social (LUM)**

The LUM will be the venue of the Keynote Lecture presented by Fiorenza Micheli and the Opening Reception on Monday night, July 01. This space has been created by the Ministry of Culture of Peru with the aim of offering cultural, learning, research and commemoration activities in order to talk about human rights and focusing on the period of violence in Peru, initiated by terrorist groups (1980-2000). The LUM promotes a critical and objective judgment toward violent discourses that violate the integrity of the human being. In that sense, it welcomes the diversity of voices and faces that experienced violence during the period 1980-2000, and seeks coexistence between the various memories, for mutual learning. It assumes the challenge of establishing dialogue as a starting point to reflect on our differences and live with them.

## **Huaca Pucllana**

Huaca Pucllana Restaurant will be the venue of the Conference Dinner on Tuesday night July 02, 2019. The restaurant is located at the archaeological site Huaca Pucllana, district of Miraflores, province of Lima. This Huaca has been researched, conserved and restored since 1981 by a multidisciplinary team led by the specialist Isabel Flores Espinoza with the support of the Ministry of Culture of Peru and the Municipality of Miraflores. The Huaca Pucllana is comprised of a pyramid of 25 meters of height and a set of patios, squares and enclosures to the northeast. It covers six hectares, but in the 1940s it was triple the size that it is today.

## **Complejo Arqueologico Huaca Mateo Salado**

The monumental archaeological Mateo Salado, also known as Huaca Mateo Salado will be the venue of the last Keynote Lecture presented by Brigitte Baptiste, followed by a Policy Dialogue organized by the Bicentennial Commission of Perú on Friday night July 05, 2019. This Huaca with its considerable size (16.4 hectares), is one of the most representative expressions of the pre-Hispanic architecture of the Peruvian capital. It was an administrative and religious center of the Ychsma culture during the Late Intermediate period, beginning its construction around 1100 AD. Its occupation continued with the Incas, who modified the architecture of the site and incorporated it into the Andean road system known as Qhapaq Ñan, which spans thousands of kilometers throughout the Tahuantinsuyo Empire. In 2001 it was declared a Cultural Heritage of the Nation.

# General Program Information

## Academic Sessions

The academic sessions will take place in the Pontifical Catholic University of Peru. During 4 days we will have around 500 hundred presentations. On the opening day (Monday 01) there will be two sessions in the afternoon. On Tuesday 02 and Friday 05 there will be 3 slots per day and on Wednesday 03 there will be 4 slots. On Thursday there will be no sessions, but single day excursions across Lima. Research sessions usually consist of 4 presentations. All sessions are scheduled in the Pontifical Catholic University of Perú.

## Pre-Conference Workshops

Training sessions on specific skills will be held on June 28, 29 and 30.

### June 28

*Workshop A: Basic GIS con gvSIG*

Sergio Acosta y Lara | 08:30-17:00 | Spanish

### June 29

*Workshop B: Introducción a los bienes comunes*

Leticia Merino | 08:30-17:00 | Spanish

*Workshop C: Peruvian gastronomy & agricultural biodiversity*

Karissa Becerra | 08:30-12:00 | English / Spanish

*Workshop D: Enfoques de comportamiento y métodos experimentales para entender los bienes comunes*

Juan Camilo Cárdenas | 13:30-17:00 | Spanish

### June 30

*Workshop E: Agent-based modeling Tutorial*

Marco Janssen | 08:30-12:00 | English

*Workshop F: Introduction to the commons*

John Powell | 13:30-17:00 | English

### OPEN ROUNDTABLE:

*Promise of Commons Initiative: Building collaboration in research and capacity strengthening*  
Organizers: Foundation for Ecological Security (FES), Collaborating for Resilience (CoRe), Center for International Forestry Research (CIFOR), and International Food Policy Research Institute (IFPRI).

Sun June 30 | ROOM N101 (McGregor Building) | 9:30 - 12:30 | English

## Multi Stakeholder Dialogues

Building on the fruitful experience of the Practitioner's Labs and Round Table Sessions in the previous IASC global conference (held in Utrecht in 2017), the Multi-stakeholder Dialogues will provide a unique platform for knowledge exchange across different social actors. These 'dialogue' sessions have been designed to be flexible and will take different formats. They are structured around a particular question, or challenge, facing commons

theory, practice, management or governance. All these dialogues are composed of at least two different types of commons-related stakeholders (e.g. citizen, practitioner, indigenous peoples' organizations representatives, private sector, public sector, policy-maker, academic researcher, local communities activist). During this year's conference 19 Multi stakeholder dialogues will take place parallel to the research sessions, and will take 90 to 120 minutes as shown in the program.

## Poster Display And Pitches

Posters will be displayed in the Tinkuy, which in quechua means "reunion" "meeting". This is a special space that we have created as a point of reunion between sessions. There you can have a cup of coffee and enjoy the posters that will be presented there.

The Poster pitch sessions have been scheduled on Wed July 03 (15:30 - 17:00) at Tinkuy which is located between the Aulario and the Complejo de Innovación Académica (CIA) where most of the parallel sessions will be held.

### **Kentaro Miyanaga:**

Making Adaptive Governance Work in Biodiversity Conservation: Some Lessons in Invasive Aquatic Plants Management in Lake Biwa, Japan.

### **Alicia Tenza, Irene Pérez-Ibarra, Marco A. Janssen, Aurora Breceda, Christian Silva-Bejarano, Andrés Giménez:**

### **Zilda Joaquina Cohen Gama dos Santos, Leonardo Xavier da Silva, Isabel Garcia Drigo:**

Forest and people: forms of governance in a Brazilian National Forest

## Policy Dialogues

Expert discussion meetings, with 3 invited experts (practitioners and researchers), on a specific commons-related public policy issue. Translation Services will be provided during all these events.

### **Public Policy Dialogue 1: Polycentric governance in the Amazon**

Tue July 02, 13:00 - 14:00, Multipurpose Room (SUM)- CCSS, PUCP

Organized by the Escuela de Gobierno y Políticas Públicas, PUCP

Moderator: Deborah Delgado - PUCP

Speakers:

- Pedro Bogarín Regional, Governor of San Martín
- Luis Hidalgo Okimura, Regional Governor from Madre de Dios
- Fabiola Muñoz Doderó, Minister de Agricultura y Riego

Discussants:

- Anne Larson, Principal Scientist, CIFOR
- Holger Treidel, Proambiente GIZ

### **Public Policy Dialogue 2: Multi-sectoral articulation, risk management and urban commons**

Wed July 03, 09:00- 10:00, Multipurpose Room (SUM)- CCSS, PUCP

Organized by the School of Government and Public Policies, PUCP

Moderator: Flavio Ausejo

Participants:

- Hernán Felipe Flores Ayala, Vice Minister of Policies for the Defense
- Jorge Luis Chavez Cresta, Director of the Instituto de Defensa Civil

Discussants:

- Marco Janssen, IASC President
- Mariana Alegre, Lima Como Vamos - PUCP

### **Public Policy Dialogue 3: Innovation and Traditional Knowledge**

Fri July 05, 09:00- 10:00, Multipurpose Room (SUM)- CCSS, PUCP

Organized by: Sheffield Institute for International Development (SIID), Faculty of Social Science; Universidad del Pacífico

Moderator: Carlos Loret de Mola

Panel:

- Alejandro Argumedo, President of the Andes Association
- Mariano Sutta, Potato Park
- Dra. Rosmary Cornejo, Innovate Perú
- Jessica Jenifer Mora Velit, Concytec

Discussants:

- Friket Berkes, Manitoba University
- Roger Merino, Pacifico University

# Special Events

## Opening Ceremony

All registered participants are invited to attend the IASC 2019 Opening Ceremony. Mon July 01, 10:00-12:00, Auditorium of the Law School, PUCP.

## Opening Reception

All registered participants are invited to attend the IASC 2019 Opening Reception following the Keynote Lecture presented by Fiorenza Micheli. This event will be followed by cocktails.

Mon July 01, 19:00 - 21:00, Lugar de la Memoria, la Tolerancia y la Inclusión Social (LUM)

## Conference Dinner\*

Elinor Ostrom Awards for this year will be announced during this special dinner including a brief recognition of awardees.

Tue July 02, 20:00 - 21:30, Huaca Pucllana Restaurant

\* Prior registration required. Please check at the registration desk for availability

## Closing Ceremony

All registered participants are invited to attend the IASC 2019 Closing Ceremony, opened by the Keynote Lecture presented by Brigitte Baptiste. This event will be followed by cocktails.

Fri July 05, 18:30 - 21:00, Huaca Mateo Salado.

Do note that transportation will be available for all interested participants to the main venues, the departure will leave the Faculty of General Sciences parking lot. The transportation timetable are the following:

PUCP - LUM

Departure: 17:45 - 18:00

PUCP - Huaca Pucllana

Departure: 19:00 - 19:15

PUCP - Huaca Mateo Salado

Departure: 18:00 - 18:15

# Plenary Events

## Keynote Lectures

Translation services will be provided for all of them

**Mon July 01, 19:00-20:00, LUM**

**Fiorenza Micheli (Stanford University , USA)**

Social-ecological vulnerability and adaptation to a changing ocean

Comments by Marco Janssen IASC President

**Tue July 02, 17:30 - 19:00, Auditorium of Law School - PUCP**

**Wrays Pérez (Presidente del Gobierno Autónomo Territorial de la Nación Wampi)**

Territorios Amazónicos y autonomía: La experiencia del GTAN Wampis

Comments by Tania Pariona - Congresswoman of the Republic of Perú

**Fri July 05, 18:30-21:00, Huaca Mateo Salado**

**Brigitte Baptiste (Directora General del Instituto de Investigación de Recursos**

**Biológicos Alexander von Humboldt , Colombia)**

Manejo compartido de la biodiversidad y los servicios ecosistémicos.

Comments by Manuel Pulgar-Vidal and Lucía Ruiz Ostoić, Ministra del Ambiente

## IASC Membership Meeting

General meeting of the IASC; you are also welcome if you are not a member (yet).

**Tue July 02, 12:00-13:30**

Room B100, Centro de Innovación Académica (CIA), PUCP.

At this event, the IASC Council will present a report on the past two years and its future plans.

The meeting is open to all IASC2019 participants, members and non-members.

## IASC Regional Meetings

Meetings for delegates from same region/continent to discuss future plans of collaboration

**Mon July 01, 12:00-13:30,**

**North America, Asia, South-East Asia and Africa.**

Place: Sala Uno, Centro de Innovación Académica (CIA).

Lunch boxes will be provided on place

**Fri July 05, 12:00-13:30,**

**Europe, South and Central America**

Place: Sala Uno, Centro de Innovación Académica (CIA).

Lunch boxes will be provided on place

## **Young Scholars Meeting**

The meeting for young scholars has been developed in order to exchange experiences and useful connections and tips regarding the academia.

Pizza and Soft drinks will be on the house!

Wed July 03, 19:00 - 21:00

Place: Sala Uno, Centro de Innovación Académica (CIA), PUCP

## **Lunch Locations**

You will receive 4 lunch tickets, one for each day of the conference. You can use them to pick a lunch box or use them in one of the main restaurants at the main conference venue. The lunch boxes will be delivered at “Tinkuy” and “Sala Uno”.

Lunches will be served in the PUCP in all the restaurant spots marked in the following map:

## **OTHER NOTES TO THE PROGRAM:**

· Name Tags and all the things you don't want to take home:

We had to use some plastic for on the Name Tags. There will be a place to leave them for recycling. In exchange for it, you will receive a special surprise!

· On Tuesday, July 2nd, during the gala dinner, there will be a visit to the Huaca Pucllana (an archeological site dating back to 200 A.C.) next to the dinner site.

## **DO NOT FORGET:**

· Our first keynote lecture will be held at the Lugar de la Memoria, la Tolerancia, y la Inclusión Social (LUM). Buses will be leaving at 17:45 - 18:00 at the General Sciences Parking Lot - PUCP!

· Regarding the Ostrom Award:

The laureates will receive their awards during the conference dinner on Tuesday July 2nd at the Huaca Pucllana.

The Ostrom Award Lectures will be held during the lunch on Wednesday, July 3rd at the Auditorium of the Faculty of Social Sciences from 12:00- 13:30.

# IASC Book Fair 2019

The Book Fair is organized in partnership with the Library System of the Pontificia Universidad Católica del Perú. It will be held during the 4 days of the conference in Room A-100 from 9:00 a.m. to 17:00.

It will exhibit publications by Peruvian and international institutions. The fair will also host multiple activities, such as book and publications launches, round tables with journal editors, and discussions regarding the editorial activity and the commons. Furthermore, following the line principles of the IASC, activities regarding the Peruvian Land Reform will be shown in the Faculty of Social Sciences.

## Tuesday July 02

**09:00-10:00:**

**Common goods in a glocal world: global connections and local responses.**

Editors:

Tobias Haller, Professor at the Institute of Social Anthropology, University of Bern.  
Thomas Breu, Director, Center for Development and Environment, and Executive Director, International Graduate School North-South, University of Bern.  
Tine De Moor, Department of Social and Economic History, University of Utrecht.  
Christian Rohr, Environmental and Climate History, University of Bern.  
Heinzpeter Znoj, Institute of Social Anthropology and Director of the Board of the Center for Development and Environment at the University of Bern.

**10:00 - 11:00:**

**Book Launch:**

**COMMUNITIES SURVIVING MIGRATION: Village Governance, Environment, and Cultural Survival in Indigenous Mexico.**

Edited by James Robson, Dan Klooster, and Jorge Hernández-Díaz. Available through Routledge.

**MAKING COMMONS DYNAMIC: Understanding Change Through Commonisation and Decommonisation.**

Edited by Prateep Kumar Nayak. Forthcoming through Routledge

**11:00 - 12:00:**

**Editorial Cambridge University Press.**

Elinor Ostrom en Cambridge University Press: una brevisima revisión bibliográfica.  
Presented by Sergio Zepeda

**12:00 - 13:00:**

**Presentation of GRADE y su quehacer de investigación a través de sus publicaciones.**

Presented by Diana Balcarza, librarian specialist, GRADE.

**15:00 - 16:00:**

**OXFAM Publication: "Plantando conflictos: agronegocios y disputas por la tierra en la Amazonía peruana".**

Presented by: Clemence Abbes.

**16:00 - 17:00:**

## **FAO Publications.**

Presented by: Safia Aggarwal, FAO.

- Assessing the governance of tenure for improving forests and livelihoods: A tool to support the implementation of the Voluntary Guidelines on the Responsible Governance of Tenure (FAO, 2019).
- A framework to assess the extent and effectiveness of community-based forestry (FAO, 2019).
- Governing Tenure Rights to Commons: A Technical Guide to support the implementation of the Voluntary Guidelines on the Responsible Governance of Tenure of Land, Fisheries and Forests in the Context of National Food Security (FAO, 2016)

## **Wednesday July 03**

**08:00 - 10:00:**

### **"Meet the Editor Session"**

The publication industry has notably changed in the last decades, both on the publisher and academic sides. Changes on the publisher side includes the burgeoning of open source publishing, the concentration of publishing services in a handful of big houses, and the advent of predatory journals to name a few. Changes on the academic side include the rise of collaborative and multi-author publishing (particularly in the social sciences), the hegemony of the "publish or perish" motto, and the diversification of publishing channels and licensing conditions. This round table aims to take stock of all these changes and others, while providing orientation to early career scholars in their quest for meaningful publication strategies.

Participants: The event will include experienced scholars that hold or have held editorial board/chief editorial positions in the International Journal of the Commons (Fran van Laerhoven and Sergio Villamayor-Tomas), Journal of Policy Studies (Edella Schlager), Ecology & Society (Marco Janssen and Juan Camilo Cárdenas), Latin American Economic Review (Juan Camilo Cardenas), Ecological Economics (Roldan Muradian), and Society & Natural Resources (Peter Cronkleton). The panel will also count with a representative of the Directory of Open Access Journals (Ivonne Lujano)"

**12:00 - 13:00:**

### **Presentation of "Espacio y Desarrollo" Journal.**

Presented by: Ana Sabogal, Journal Director, PUCP.  
Comments by: Santiago Casas.

**14:00-15:00:**

### **Book Launch: "Convivir en la Amazonía en el siglo XXI: guía de planificación y diseño urbano en la Selva Baja" (in Spanish).**

Comments by: Alberto Garcia (Universidad Nacional de la Amazonía Peruana)  
Editors: Belén Desmason, Kleber Espinoza, Kelly Jaime, Luciana Gallardo, Mayra Peña and Carolina Rivera. Publicación de PUCP, Fondo Editorial y la Facultad de Arquitectura y Urbanismo.

**15:00 - 16:00:**

### **Instituto del Bien Común (IBC – Perú) Publication:**

"Gobernanza colaborativa en la Pesca. Modelo participativo para gestión pesquera en la Amazonía peruana"  
Presented by the Authors: Vanessa Rodríguez, Edgardo Castro, Luis Collado.

**16:00 - 17:00:**

### **Presentation of the Instituto de Estudios Peruanos (IEP), Publishing House.**

Presented by: Ludwig Huber, director of IEP Publications.

### **Friday 05 July**

**09:00 - 10:00:**

**Presentation of Jstor: Journals and Books in open access.**

Presented by: Gustavo Orozco, Dotlib Information LLC

**10:00 - 11:00:**

**Presentation of CIFOR publication: "Guía práctica para el proceso de titulación de comunidades nativas "**

Presented by: Iliana Monterroso and Anne Larson, CIFOR.

**11:00 - 12:00:**

**Presentation: "Comunidades campesinas y nativas en el contexto neoliberal peruano : una lectura del CENAGRO y las hojas de información complementaria".**

Presented by: María Isabel Remy, Jaime Urrutia, María Luisa Burneo. Publishing Houses: IEP, CEPES.

## **Focus on the Peruvian Land Reform**

### **Exhibition Of Infographics About The Peruvian Land Reform**

From Monday July 01 to Friday from 9:00 - 17:00, on the exterior of the Social Sciences Faculty main building: "Nuevo Complejo", PUCP.

The Library of Social Sciences: "Alberto Flores Galindo", that has been collaborating with this main activity, is located on the second floor of this venue, has organized an exhibition of the Book Collection about Peruvian Land Reform.

### **Edit-A-Thon On Agrarian Reform In Peru**

A group of activists will congregate for a couple of hours to enter Wikipedia content about Peruvian Land Reform information.

This activity will be held on Friday July 05, 14:00 - 18:00, A100, Aulario, PUCP.

# Clima de Cambios Booth

Clima de Cambios is an initiative of the Pontifical Catholic University of Peru that has been created in 2008 under the aim to inform the public about the impacts of climate change in the country and the world. It offers practical advice on how to contribute to the conservation of our environment. Clima de Cambios, through a communication strategy, has as main objective to make visible the commitment of the PUCP with the care and protection of the environment, which includes all the actors of the university community, whether students, teachers and administrators.

## Artisans Fair “Sumaq Ruway”

“Sumaq Ruway” in quechua means “the art of crafting”. This space will offer different exhibitions and products for sale. This fair seeks the meeting between the academic community, conference participants and artisans, as part of a commitment to the positive recognition of diversity, exchange, and the possibility of building an integrative and non-exclusive knowledge. It is a collaborative by the Dirección Académica de Responsabilidad Social (DARS, after its spanish initials), Axis Arte, and different organizations of artisans from Peru.

# The Ostrom Film Festival

Visual communication is a complementary part of any research process. It is complementary because verbal language is different from what is perceived with the eyes, and with other senses. They are two distinct languages, two ways of perceiving the world and imagining what it could be. Fiction as narrative genre is the materialization of the imagination. They invite us to imagine and connect the verbal language, in which science is handled, with the rest of our body. That is why we need to combine art and science to mobilize the defense of the commons. Without the presence of imagination and sensitivity of all the senses there is no mobilization.

The festival will host continuous screenings from Monday, July 01 through Friday, July 05. This film festival has been organized in partnership with the Master's Programme in Visual Anthropology of the PUCP. Admission to all events are free for registered participants.

## Film Festival Highlights

### Short Films

It will be presented a small selection of short films about Commons in our region. This selection has been done by the Master's Programme in Visual Anthropology of the PUCP. Furthermore, it will be screened a small selection from the Commons Video Contest during the IASC Commons Virtual Conference 2018.

Monday, July 01, 15:30 - 17:00, Auditorium of the Central Library (3rd Floor), PUCP.

### Rio verde. El tiempo de los yakurunas

Directors: Diego Sarmiento and Álvaro Sarmiento

Tuesday, July 02, 15:30 - 17:00, Auditorium of the Faculty of Humanities, PUCP.

### Pacificum, el retorno al océano

Directed by: Mariana Tschudi

Wednesday, July 03, 13:30 - 15:30, Auditorium of the Faculty of Humanities, PUCP.

### Actual World, Possible Future--The Lives and Work of Elinor and Vincent Ostrom

We will have the participation and comments of the director Barbara Allen, Carleton College.

Wednesday, July 03, 15:30 - 17:00, Auditorium of the Faculty of Humanities, PUCP.

# Excursions

A series of excursions have been organized to visit several places and citizens' initiatives that are closely linked to the main theme of the XVII Biennial IASC Conference 'In Defense of the Commons: Challenges, Innovation, and Action'. We will have four day trips, and two excursions of 3 - 4 days.

## Practical Issues

- All field trips, except Paracas, will depart from PUCP's Main Lima campus (Av. Universitaria 1801, San Miguel) and will also return to this location.
- Please make sure to arrive on time at the departure location so that we can meet all the schedule we have planned!
- In case of specific physical needs, please contact the conference organizers well in advance via ([conference@iasc2019.org](mailto:conference@iasc2019.org))
- All field trips will be accompanied by one or two representatives of the conference organizing team, who will act as liaison for the conference staff during the field excursions.

## Departure Location

## DAY TRIPS

Ex	Title	Topics	Time	Region	USD \$	Snack	Lunch
1	Cantagallo urban indigenous community	Discovery of the culture, tradition and knowledge of indigenous community of Lima	9:00-14:00	Rimac, Lima	30\$	Included	Included
2	Villa María del Triunfo Hills (EbA lomas)	Protection of the Loma's seasonal ecosystem	9:00-13:00	Villa María del Triunfo, Lima	30\$	Included	Included
3	Paracas Natural Reserve	Socio-environmental impacts of tourism infrastructure on Natural Reserve	9:00-13:00	Paracas	50\$	Included	Included
4	Cyclist Protector Circle of the Huacas heritage	Conservation of the Huacas and promotion of the bicycle as a means of transport	08:30-18:00	Lima Norte, Lima	20\$	Included	Not Included

### Ex. 1: Cantagallo urban indigenous community

During this excursion, we will visit the first native urban community in Peru (according to the criteria of ILO Convention No. 169 to identify the indigenous population), located in the district of Rimac, in Lima. These families emigrate from the Amazon region of Ucayali to Lima in the decade from 1990 to 2000, in pursuit of better opportunities. They're still identify the mselves as an indigenous community, affirming their common use of space as Shipibo-Konibo people.

This visit will allow us to present the importance of the culture for this community. Until today, they maintain their language, art, knowledge and internal rules related to coexistence. As an illustration, they base their economic activity on handicraft and painting (they are well known for their specific Shipibos design called Kené). They also have their own bilingual school, which teaches the importance of maintaining the Shipibo culture.

### Ex. 2: Villa María del Triunfo Hills (EbA lomas)

During this excursion, we will visit Villa María del Triunfo, which covers 1700 hectares of this ecosystem. The Lomas are only found in Peru and Chile and are seasonal ecosystems that come with winter heavy fogs. It has a rich flora and fauna and provides a diversity of environmental services, such as improvement of air quality. In 2006, the lomas were defined by Inrena (National Institute of Natural Resources) as Priority Conservation Area in Peru, and in 2013 as a fragile ecosystem by the Minister of Agriculture and Irrigation. But nowadays, the Lomas are endangered, especially because of the intense urban expansion of the last decades.

During this visit, participants will visualize the pressures upon the ecosystems because of housing demand, infrastructure and economic activities. There is a local organization composed by residents of surrounding neighborhoods and volunteers that fight for the preservation of this ecosystem while promoting touristic activities. Together with other Loma’s associations in Lima, they lobby for the creation of a protected area. UNDP is an important stakeholder that gives support to this initiative.

**Ex. 3: Paracas Natural Reserve**

During this excursion we will visit the Maritime Natural Reserve of Paracas, located in the South of Lima (250 km). This natural reserve is the only protected maritime area, protecting a wide range of flora and fauna. We will first visit an association of fishermen situated in this protected area, which has selective seafood collection techniques. Then we will visit archeological sites.

This experience is important to visualize the socio-environmental impacts due to the radical increase of exclusive tourism infrastructure.

**Ex. 4: Cyclist Protector Circle of the Huacas heritage**

Circle of the Huacas, crossing 45 kilometers of Lima. This collective of cyclists promote the use of the bicycle and contribute to the revalorization of the huacas of Lima, pre-Hispanic settlements that remain important pieces of the archaeological and historical past of the city. According to the Ministry of Culture, there are about 431 identified huacas in Lima, situated in the traditional and modern parts of the city. Although they were recognized by the State as cultural heritage (377 declared cultural heritage and only 27 have been conditioned and valued in 2017), many of them are inadequately used, abandoned, threatened by garbage and by construction for housing. We will do a cycling tour of 16 km (round trip) starting from the PUCP and arriving at the huaca Garagay (San Martín de Porres). This tour will permit us to show you the different treatment of the huacas (protected/abandoned). Six guides will accompany you and tell some myths about these ancient places, histories about ancient ways to see land and share spaces and reflects on urban memory.

**LONG EXCURSIONS**

Ex	Title	Days	Region
5	Altomayo	July 6 -9	San Martin
6	Villa Carmen & Wayqecha	July 6 -8	Cusco

**Ex. 5: Altomayo**

The objective of this site visit is to showcase, through a ten year on-the-ground process, how conservation organizations, academic institutions, indigenous communities, local governments, private sector companies and national level governmental agencies can partner and, through research, planning and participatory interventions, learn to adapt and jointly build a sustainable landscapes pilot program in an Andean-Amazon landscape. The challenges faced are many, from aligning indicators and activities to newly signed national level commitments to climate change (Paris Accord, National level contributions) and sustainable development goals, to securing sustainable development

pathway for farmers and local community ventures through partnerships and access to specialized markets. The Alto Mayo landscape holds some of the highest deforestation rates in the Peruvian Amazon due to the increasing global demand for commodities like coffee and cacao. Local organizations and the Regional Government of San Martin have been driving efforts since 2009 to revert this situation. It is home to the first REDD+ project in an NPA and probably one of the longest successful REDD+ processes in the field today. It soon became apparent that the NPA REDD+ project would require additional strategies under a sustainable landscapes approach to reduce the advance of deforestation in the region. The field visit will aim to talk to different stakeholder types, and understand the challenges faced to deter deforestation at scale, using research and partnerships with the private sector and governments to shape and guide how we can be more efficient and strategic when it comes to reducing deforestation rates.

## **Ex. 6: Villa Carmen & Wayqecha**

In addition to well-conserved natural environments and very different forests, each of the ACCA Stations (Villa Carmen & Wayqecha) is strategically located at a different altitude within the gradient between the puna and the Amazonian forests. This allows a great diversity of studies within each station, but also comparative studies of evolution and behavior, and monitoring of joint effects between the three stations.

Additionally, each of the stations maintains a strong relationship with the surrounding native communities in a way that allows access to knowledge of local cultures and their uses of resources, with which researchers interested in anthropological and social aspects linked to the conservation have ample space for the development of their projects.

# Opening Ceremony

Monday July 01, 10:00-12:00, Auditorium Law School, PUCP

**Moderators:**

- Deborah Delgado - Co- chair of IASC Conference 2019, researcher , PUCP.
- Juan Camilo Cardenas - Co- chair of IASC Conference 2019, Full Professor and Dean, School of Economics, Universidad de los Andes, Colombia.

**Participants:**

- Gabriel Quijandría Acosta, Vice Minister of Strategic Development of Natural Resources, Ministry of the Environment, Peru.
- Diego Mellado - Ambassador of the delegation of the European Union in Peru
- Efraín Gonzales de Olarte - Rector, PUCP
- Patricia Ruiz Bravo - Dean of the Faculty of Social Sciences, PUCP.
- Marco Janssen -President of the International Association for the Study of the Commons

# PROGRAM

# SLOT 1

MONDAY, July 1

## 1-A

### The Future of Forest Work and Communities

Chair: James Robson

Room: 403

**James Robson (University of Saskatchewan):**

Rural-Urban Linkages and Youth-Community-Forest Perspectives: Insights from Mexico

**Marlene Soriano (Instituto Boliviano de Investigación Forestal):**

Place, Family and Livelihood Are Important to Forest Youth in Bolivian Indigenous and Peasant Communities

**Julia Quaadvlieg (Independent Research):**

Youth Perspectives from Rapidly Changing Landscapes: Lessons from Peru  
Everisto Mapedza (IWMI): Migration and its implication on Social Transformation Trajectories in Ghana

**Sarah Jane Wilson (University of Connecticut):**

Youth outmigration and the next generation of forest work: Challenges, opportunities, and innovation in forest communities

## 1-B

### Supporting fieldwork-based commons analyses in social-ecological systems

Chair: Michael Cox

Room: 601

**Michael Cox (Dartmouth College):**

The Commons Workshop Wiki

**Georgina Gurney (ARC Centre for Coral Reef Studies):**

Social-ecological systems monitoring of coral reef commons: a transdisciplinary collaboration

**Sergio Villamayor-Tomas (ICTA):**

Case study methods: Building blocks for the systematization of SES governance case research

**Natalie Ban (University of Victoria):**

Engaging in 'action-oriented' fieldwork with local groups and Indigenous peoples

MON

TUE

WED

THU

FRI

**1-C**

## Information and effective communication

Chair: Corinne Schweizer

Room: 406

**Tom Koontz (University of Washington Tacoma):**

The role of scientific information sharing in polycentric governance: Ecosystem recovery in the Puget Sound, USA

**Ann-Kathrin Koessler (Institute for Environmental Systems Research):**

Structuring the Talk - Elements of Effective Communication

**Corinne Schweizer (University of Zurich):**

Collective Action for the Media Commons: No Billag and beyond

**Jessica Rudnick (University of California Davis)**

Brokering Water Quality Narratives: The role of boundary organizations in a collaborative governance approach to agricultural nonpoint source pollution

**MON**

**1-D**

## Gender and socioecological systems

Chair: Elizabeth Peredo Beltrán

Room: 407

**Ruth Meinzen-Dick (International Food Policy Research Institute):**

Women's tenure security on collective lands: Implications for measurement and policy

**María del Mar Delgado-Serrano (Universidad de Córdoba):**

Understanding gender differences in the perception of Social-Ecological Systems in CBNRM contexts

**Elizabeth Peredo Beltrán (Trenzando Ilusiones):**

Antropoceno, biopolítica y resistencias ecofeministas en América Latina: El caso de las mujeres de la reserva natural de Tariquia en Bolivia

**TUE**

**WED**

**THU**

**FRI**

**1-E**

## Contemporary challenges of Urban Commons

Chair: Esteban Poole Fuller

Room: 603

**Lucero Radonic (Michigan State University):**

Stormwater: A new commons in the urban U.S. Southwest, or not?

**Jean-Philippe De Visscher (UCLouvain):**

Making better use of existing "Spatial Capital" through commoning, seven design investigations

**Geraldine de Neuville | Jean-Philippe De Visscher (UCLouvain):**

Integrating, securing and formalizing a (in)formal system of solid waste management by means of research by design

**Esteban Poole Fuller (Pontificia Universidad Católica del Perú):**

Privatization and restriction of the use of public space in Lima and its interrelation with the fear of crime discourse

**1-F**

## **Fisheries Governance: emergent conservation and cooperative arrangements**

**Chair: Akiko Ikeguchi**

Room: 604

**Carlos Hidalgo (Universidad de Los Lagos):**

Fishing wiers as social-ecological systems: Insights for anthropological research of insular commons

**Francisco Araos (Universidad de Los Lagos):**

"ECMPOs" emergent conservation arrangements for the protection of indigenous seascapes in Chile

**Akiko Ikeguchi (Yokohama National University):**

Adaptive governance of coastal fisheries resources in response to Isoyake (seaweed deforestation) in Japan

**1-G**

## **Governing Mountain Commons: Challenges and Opportunities for Sustainability in Contexts of Change**

**Chair: Catherine Tucker**

Room: 606

**Elizabeth Jimenez (CIDES - Universidad Mayor de San Andres):**

Managing the commons in the Bolivian Southern Highlands: Quinoa producers, markets and sustainability

## SESSION 1-N

# MULTI-STAKEHOLDER DIALOGUE

### Negotiating a way towards consilience in managing conflicts over commons

Monday July 1

Room: 602

Conflict is part of the dynamics of any socio-economic and ecological system that involves multiple stakeholders with varying agendas, understanding, and perceptions, and is inevitable where a resource is managed in common. Despite the pressures on common pool natural resources, efficient and context-sensitive ways to manage conflict remain under-developed. Although participatory and deliberative processes help in building solutions, when stakeholders hold polarised positions and are less willing to enter into discussion, such approaches fall short.

Although the literature contains many success stories of conflict resolution in relation to natural resources the nature of negotiated outcomes are not always clear (Redpath, et al., 2013). There is a clear nod for research on how to disaggregate and re-assemble the dynamics involved in conflict management, which lies at the centre of the action arena (Ostrom, 1990). A key step concerns the transformation from relationships of distrust into situations where constructive exchange can potentially occur. Building on work conducted in the Middle-East (Bundhoo, 2018), this can be conceptualised as a process of "consilience", developed through interpersonal resilience that will enhance the ability to negotiate. Consilience is defined as the process of agreement or concurrence through bringing together different perceptions or understanding of an issue under consideration.

The aim of this multi-stakeholder dialogue is a first step to explore the potential for development of an interpersonal resilience-based approach to commons conflict management. Our aim is to initiate a discussion platform where academics and practitioners can share their practical, lived, and research experiences in relation to conflict management.

The aim of the dialogue is to build understanding through engagement with a heterogeneous group of stakeholders from different sectors of society: academia, government, resource users and managers, The knowledge exchange across different social actors will take the form of a workshop divided into three sessions:

\* Short presentations from a selected panel of academics and practitioners (pecha kucha style) focusing on issues identified from pre-Dialogue discussion between participating academics and practitioners who have experience of commons conflict. Wider audience discussion will then set the scene for structuring the dialogue around specific themes relevant to the conference and the Peruvian context.

\* Small-group themed discussions around a small set of defined issues that arise from the discussion in the first part of the Dialogue. This element will require input from a wider set of actors to enable exploration of how different stakeholders perceive, experience, and act, within particular conflict situations.

\* The final (plenary) session will involve feedback and discussion within the larger group and identification of actions going forward, and potentially, development of a practitioner/academic research group to seek funding to develop and test the conflict management methodology.

## SESSION 1-0

# MULTI-STAKEHOLDER DIALOGUE

**Seguridad jurídica de los territorios colectivos de los pueblos indígenas en el Perú:  
¿Cuánto se avanzado y qué falta por hacer?**

Monday July 1

Room: 705

La seguridad jurídica de la propiedad de las comunidades campesinas y nativas (expresión jurídica de los pueblos indígenas u originarios) es un concepto amplio que no solo implica la formalización de la propiedad territorial a través de la titulación, sino que implica dotar de todas las garantías al ejercicio del derecho de propiedad, para que no sea afectado por terceros, incluyendo al mismo Estado.

La seguridad jurídica de la tierra que exigen los pueblos indígenas u originarios, se ha visto más amenazada en los últimos años no solo por una creciente industria extractiva, sino también a través de varias medidas normativas que tanto el Congreso como el Ejecutivo han emitido. Estas medidas han sido dadas en el marco de la reactivación económica que, a decir de algunos economistas, no ha logrado su objetivo, ya que su impacto en la economía nacional no ha sido significativo.

Paralelamente, los procedimientos para el reconocimiento de la propiedad legal de estas tierras son cada vez más lentos y, aunque se vienen promoviendo diversos proyectos de titulación de tierras, no se ha logrado satisfacer aún la demanda histórica de estos pueblos.

Este panel reúne la experiencia de tres instituciones que investigan y trabajan sobre gobernanza de la tierra y como parte de ello en el tema de seguridad en la tenencia de los territorios de pueblos indígenas.

## SESSION 2-N

# MULTI-STAKEHOLDER DIALOGUE

### Achievements and challenges of the collective titling program to Afro-Colombian Communities in Colombia

Monday July 1  
Room: 602

During the mid-1990s one of the most ambitious land reforms of recent decades took place in Colombia by recognizing collective rights over land to the Afro-descendent population that inhabits the Pacific coast of the country. With the goal to benefit the groups that had historically occupied these territories and preserve valuable ecosystems in what is considered a hotspot of biodiversity, the government has titled almost 6 million of hectares, to rural based communities instead of individuals. This new property rights regime changed the political structure of the country's Pacific region, with the emergence of new local authorities who have gained visibility and power. In this multi-stakeholder Dialogue we will discuss the achievements and challenges of the collective titling program to Afro-Colombian Communities in the Pacific Coast. What has been the impact of this reform in poverty reduction? What is the impact on forest governance and natural resource management? What are the challenges to develop productive activities within the collective territory? What would have happened in the absence of this titling for the commons management?

To answer these questions from different perspectives, we gather academics who have been studying the effects of this titling program, NGOs's officers who have led and implemented development and conservation programs in the region, and community leaders who are defending these collective territories. We will film this exchange and produce a policy brief with the lessons of this program.

# Keynote Lecture & Opening Reception

## FIORENZA MICHELI

(Stanford University, USA)

### Social-ecological vulnerability and adaptation to a changing ocean

Monday July 01, 19:00-21:00

Lugar De La Memoria, Tolerancia E Inclusión Social (LUM)

Fiorenza Micheli is a marine ecologist and conservation biologist conducting research and teaching at the Hopkins Marine Station of Stanford University, where she is also the David and Lucile Packard Professor of Marine Science and the Director, with Jim Leape, of the Stanford Center for Ocean Solutions ([www.centerforoceansolutions.org](http://www.centerforoceansolutions.org)). Micheli's research focuses on the processes shaping marine communities and incorporating this understanding in the management and conservation of marine ecosystems. Her current research projects investigate social and ecological drivers of the resilience of small-scale fisheries to climatic impacts in Baja California, Mexico, the ecological and socioeconomic impacts of coastal hypoxia and ocean acidification in the California Current large marine ecosystem, the ecological role and spatial ecology of parrotfish and reef sharks in the coral reefs of the Pacific Line Islands, the effects of ocean acidification on seagrass, rocky reef and kelp forest communities, and the performance and management of marine protected Areas in the Mediterranean Sea. She is a Pew Fellow in Marine Conservation, a fellow of the California Academy of Sciences, and senior fellow at Stanford's Woods Institute for the Environment.

# MULTI-STAKEHOLDER DIALOGUE

## Inequality and the SDGs: synergies and tradeoffs

Tuesday July 2

Room: 602

Countries around the world have committed to achieve 17 SDGs. Increasing inequality has become an urgent issue across both developed and developing economies and it has been considered one of the defining challenges of our time. A number of the so-called 'planetary boundaries' has been crossed, putting the planet at risk of detrimental environmental change. Managing SDGs is complex for policy-makers. The challenge is to know how SDGs interact, and which policy tools would be most effective to simultaneously meet the SDGs of the Agenda 2030. This session will examine SDGs synergies and tradeoffs, the role of inequalities therein, as well as examples of how to replicate and scale up or scale down emerging and innovative policy solutions to meet SDG challenges. We ask: How does inequality impact the achievement of SDGs at different scales? Which countries, if any, are simultaneously "prosperous, equal, and green", and why? Does there exist a 'trilemma' inhibiting the simultaneous achievement of the three goals (the "triple bottom line"), and therefore sustainable development? If so, what are the respective tradeoffs, and how might these evolve over time? The concepts of "prosperous, equal, and green" encompass virtually SDGs 10, 2, 13, 14 and 15 (Reducing Inequality, Climate Action, Life Below Water and Life on Land), while considering SDGs 8, 9 (Decent Work and Economic Growth; Industry, Innovation and Infrastructure). While inequality is often considered as a statistical pattern in the distribution of observables, such as income or wealth at the national scale, perception of inequality and fairness tend to act at much lower scales (e.g. community). Yet, it remains unclear at which scales tradeoffs between inequality and other SDGs will emerge or need to be accounted for when dealing with, for example, problems of common-pool resource management. Objective: to co-create new understandings around how different actors can contribute with the comprehension of the interactions, tradeoffs, synergies of inequalities and the SDGs. Specific objectives:

- Discuss perspectives and knowledge systems that contribute towards the understanding of inequalities and the SDGs.
- Foster knowledge generation through dialogue among different knowledge.
- Collective assessment of how perspectives and knowledge systems, practices, and institutions linked to the SDGs contribute towards the understanding of inequalities.
- Formulate recommendations to the relevant actors. Societal relevance: We aim to promote collaborative learning among actors (scientists, indigenous communities, policy-makers) around the connections of understanding inequalities and the SDGs.

The outcomes can support local, national, regional and global policy process and augment the search for future alternatives by relevant actors for the safe navigation of inequalities in the biosphere. Activities are designed to allow for diverse ways of knowledge cocreation promoted through activities including presentations by the

MON

TUE

WED

THU

## SESSION 3-O

# MULTI-STAKEHOLDER DIALOGUE

### Unraveling power play in land use planning

Tuesday July 2

Room: 404

Land use planning at the national level in Lao PDR is meant to be a technical way of dealing with competition over land. Various government ministries work together to divide up the land mass of the nation in a way that, at a first glance, might seem a-political and neutral. However, if you glance under the surface, a very different picture begins to emerge. The reality is that there is a great deal of competition for how much land is used for a specific purpose. At national level, this competition is evident in the government departments' development targets and their respective claim to specific area of land. Even if you zoom into the village level, there is significant competition for land use. For example, in areas that have been resettled with those displaced by hydropower or mining projects, there is a power struggle between the original inhabitants of the land and those who have come later. All of these issues, from the national level to the local level, show that land tenure and land use planning are arenas of significant power struggles. Without having the political influence to change national land use targets, or without being connected to the right family in the village, there is no reasonable way to exert influence over the way land is used. Land use planning processes, like most things, are embedded in existing power structures and relationships.

So how can these various power dynamics be brought into a conversation about land use planning? And how can decisions be made in a way that acknowledges the competition for land without creating the kind of political and social rifts associated with conflict? Taking the format of "living labs" the session will introduce a board game called Rule All as means to facilitate a dialogue and decision-making processes for land use planning. Designed to involve policy makers (various departments within the national ministries), civil society organizations, academic researchers, students and private sector actors, the game assigns roles such as farmer, department of forestry, department of agriculture, department of water resources, department of land, or land cadastre to each of the players.

The session has the following objectives: 1) illustrate the current disconnect between land use planning and actual land use; 2) prompt discussions on how to resolve this disconnect while making the power struggles apparent. Besides, with all players planning and executing negotiations and decisions in real time, the actual impacts of planning decisions on practical realities can be laid bare, adding transparency to the motivations behind decision making. Finally, the game's experience of revealing which players benefit or lose out force realities to be confronted, and assumptions to be contested. In this way, players can gain an understanding of dynamics and impacts, hopefully helping them better navigate real-life planning scenarios.

Tuesday July 2

Room: 701

El concepto de Transiciones Socioecológicas hacia la Sostenibilidad (TSS) surge de la necesidad de hacer una gestión de la biodiversidad partiendo del reconocimiento de que las relaciones del ser humano con la naturaleza presentan profundas interdependencias que conforman sistemas socioecológicos, los cuales sufren cambios, algunos de ellos posiblemente inevitables, impulsados por la acción humana en sinergia con los cambios ambientales globales. Estas profundas transformaciones afectan inexorablemente el bienestar de comunidades y, eventualmente, su pervivencia.

En este sentido, se hace necesario proponer una gestión de la biodiversidad explícitamente ligada con el bienestar humano, a ser aplicada en medio de los procesos de cambio, que busque mantener la viabilidad social, ecológica y económica del territorio (como las áreas de conservación). Esta gestión, además, podría contribuir a inyectar flexibilidad a los sistemas socioecológicos frente a la reto de gestionar y adaptarse al cambio climático.

### MULTI-STAKEHOLDER DIALOGUE

Kaiāulu: Gathering Tides - Perpetuating Community Caretaking of Globally Coveted Lands and Waters

Tuesday July 2

Room: 403

What actions can be taken to defend the commons in the face of global tourism, real estate markets, and resulting appropriation of lands and cultural practices? This panel discusses themes of community, rights, responsibilities and indigenous sovereignty woven together within the new book Kaiāulu, Gathering Tides. The book, by first time author and Native Hawaiian scholar, Mehana Vaughan, focuses on the north east coast of her home island of Kaua'i, Hawa'i, an area transitioning from a community of fishing families catching and sharing daily meals, to luxury private retreats for the world's wealthiest individuals. Despite significant encroachment, community actions mobilize both practice and policy to exercise responsibilities for traditional lands and waters. Building on the work of Native Hawaiian scholars and practitioners, this panel considers enduring community efforts to perpetuate kuleana ('rights and responsibilities') despite the community's experience with rapid social and environmental change.

Responding to significant encroachment, community actions mobilize both practice and policy to exercise caretaking responsibilities for traditional lands and waters. Some of these responsibilities include nurturing respectful relationships with coastal and marine resources, guarding and cultivating fishing spots, perpetuating collective harvests and sharing, maintaining connection to family lands, reasserting local governance rooted in ancestral values, and preparing future generations to carry on. The panel discussion will consider ways in which these Hawai'i-based themes and communities connect with struggles and victories of peoples in other parts of the world. How can communities losing access to lands and waters nonetheless

perpetuate responsibilities to care for these resources? What actions can be taken defend the commons in the face of global tourism, real estate markets, and appropriation of lands and cultural practices? What is the impact of reframing environmental governance and indigenous sovereignty around responsibilities, rather than rights, to increase recognition of reciprocal relationships between people and place?

## SESSION 4-0

# MULTI-STAKEHOLDER DIALOGUE

### Practice to policy impact of forest and nature conservation, governance and equity on indigenous community

Tuesday July 2

Room: 602

How does national and global practice to policy impact multilevel governance in different natural resources – pastoral land, protected areas, community land and forests, and mountains among others? How conservation policies, in particular, at the global and national level interact and influence marginal indigenous and traditional local communities, including women, on multiple scales?

This multi-stakeholder dialogue titled ‘Practice to Policy Impact of Nature Conservation, Governance, Equity on Indigenous Communities’ will focus on the relationship between indigenous as well as traditional communities, natural resources and the diverse governance tiers important to promote conservation. In doing so, it will aim to highlight the relationship between local communities (men, women, youths), the state, including the government departments indigenous institutes, social movements, civil societies, funding agencies and other private institutions including the role of decentralized local governments. Our panel aims to throw light on the less discussed issue about how some multilevel governance offers favorable conditions than others for nature conservation by indigenous communities. We will have active audience participation to add the missing geographical gaps and issues in the panel.

Our dialogue is organized by the International Union for Conservation of Nature (IUCN) under the Commission on Environmental, Economic and Social Policy (CEESP) theme on Governance, Equity and Rights (TGER). The panel will have facilitation support of Melanie Zurba, TGER Chair, and Spanish translation by Raquel Neyra.

# Ostrom Film Festival

## 'Rio Verde. El tiempo de los yakurunas' (2017)

Film Directors: Diego Sarmiento and Álvaro Sarmiento

Tuesday, July 02, 15:30 - 17:00, Auditorium of the Faculty of Humanities, PUCP.

This film is a poetic journey into the depths of the jungle. It explores the perception of time in three communities united by the Amazon basin. Guided by the songs of ayahuasca it submerges the viewer in a landscape inhabited by shamans and archetypal societies.

This hybrid narrative portrays the bodies of indigenous elders to invoke the ghosts of rubber exploitation in the late nineteenth century, conveying the memory of ancient indigenous cultures that still alive but in continuous danger of disappearing as a result of global capitalism.

# MULTI-STAKEHOLDER DIALOGUE

### The IAD Framework: Taking stock and looking ahead

Wednesday July 3

Room: 602

In 1982, Larry Kiser and Elinor Ostrom published "The Three Worlds of Action: A Metatheoretical Synthesis of Institutional Approaches", which presented what is now known as the Institutional Analysis and Development (IAD) Framework. This initial rendition included the decision situation, later renamed the action situation, the rule typology, and the levels of action operational, collective choice, and constitutional choice. While the major features of the framework remain unchanged, they have been further developed and extended. For instance, the rule typology was complemented by the grammar of institutions (Crawford and Ostrom 1995), and McGinnis (2010) developed networks of adyescent action situations. A major offshoot of the IAD framework was developed by Ostrom (2007, 2008) the Social-Ecological Systems framework, which built off the IAD framework, presented a diagnostic and prescriptive tool for scholars studying coupled natural-human systems. Although the IAD framework has been further developed and extended, there remains a common understanding of what the framework is and represents. Usages of the IAD framework have indeed a number of epistemological choices in common, including methodological individualism, materialism, or functionalism. Also, the IAD tools has been increasingly used to study new environmental problems and contexts including the water-energy nexus, digital co-production, urban commons, payment for ecosystem services, shale-gas extraction, climate change adaptation and others.

This round table aims to take stock of these applications to new settings as well as the extension of the IAD framework (networks of adyescent action situations, the grammar of institutions) with a few questions in mind: to which extent have scholars adapted the IAD to the methodological nods of new contexts and questions? Which opportunities and challenges are emerging for each of the tools and for the IAD ensemble as a whole? Do the epistemological choices of the past still hold?

# MULTI-STAKEHOLDER DIALOGUE

### Diálogo Multiactor: base de una gobernanza

Wednesday July 3

Room: 706

Líderes representantes de comunidades, de academia y sector privado, comparten experiencias de participar en Juegos Económicos en Colombia, intercambian sus percepciones sobre el dilema de los comunes aplicado en uso y manejo de los recursos naturales. Las voces de las comunidades de pescadores, recolectoras de moluscos, madereros y agricultores, muestran la importancia de entender el beneficio común vs el individual y los efectos e impactos de sus decisiones frente a los recursos en la disponibilidad y sostenibilidad como garante de medios de vida. La experiencia muestra que el entendimiento, valoración y decisiones sobre los comunes, asociados a los conflictos de uso de recursos naturales (bosque, manglar, peces, moluscos), llevó a las comunidades a promover acciones de buenas prácticas, medidas para la defensa, control social, y en general la adopción de estrategias para asegurar sostenibilidad, promovida desde las comunidades.

Los juegos, se articularon a la resolución de conflictos, facilitando la participación de muchas personas y así diseminar y ampliar la reflexión sobre dichos conflictos. Este diálogo comunitario interno, permeado por la cultura local, permitió el razonamiento sobre los comportamientos individuales y llegar a consensos para buenas prácticas, en respuestas a ¿por qué? ¿cómo? ¿cuándo? ¿dónde? ¿con quién?, lograr un buen manejo colectivo, por ejemplo, establecer vedas, capturas respetando tallas mínimas, manejo acorde al régimen de mareas y, estas iniciativas pactadas internamente facilitaron el diálogo con instituciones públicas locales, regionales y nacionales, de sectores de pesca, planificación del territorio, control y monitoreo y también las responsables del bienestar de las comunidades, con quienes se lograron acuerdos para beneficios sociales, económicos y ambientales. Este diálogo multiactor es la base de escenarios de gobernanza social.

Los resultados de los juegos se sumaron a una agenda de fortalecimiento de capacidades, liderada por WWF para lograr una gobernanza en 4 aspectos:

-Decisiones basadas en información complementadas con la aplicación de herramientas de diagnóstico participativo.

- El enfoque en derechos, para respaldar las demandas de las comunidades vulnerables.

-La articulación de actores competentes y responsables, para atender necesidades y resolver los conflictos de manera conjunta y constructiva.

-La generación de acuerdos vinculantes en un diálogo estructurado, plantea alternativas y soluciones a problemas y conflictos identificados.

## SESSION 7-N

# MULTI-STAKEHOLDER DIALOGUE

How can indigenous governance models, such as Plan de Vida, help protect the commons at a time of global environmental crises?

Wednesday July 3

Room: 602

Humanity is in crisis: causing climate change, mass species extinction, ecosystem destruction, culture and language loss. Indigenous peoples are at the forefront of the push for a different kind of relationship with the planet, one that understands our interdependence with the natural world, is rooted in seeing humans as stewards of the environment and uses collective governance systems whose goals are focused towards maintaining the equilibrium of the commons. They are the guardians of many of the world's knowledge systems and practices that offer possible pathways out of the crises to a resilient, abundant future. One of these alternative pathways (for indigenous and non-indigenous peoples alike) is the Plan de Vida (or Life Plan) approach, first developed by the Misak people in Colombia in the 1980s, and since spread across Latin America, in differing forms and to varying degrees of success.

The purpose of our session is to share and examine the Plan de Vida model in its indigenous form, as it began with the Misak, to collectively draw out learnings that could support the maintenance and defence of the commons on a global level, as well as feed into processes of commons defence in Peru. The workshop dialogue format will embody the alternative to mainstream models of development being proposed and examined. It will be indigenous led and facilitated, will employ highly participatory techniques and approaches that allow participants to engage in the topics, using harvesting techniques from a variety of schools of facilitation and giving space for indigenous perspectives and practices, such as ritual and the encouragement of alternative thinking.

Participants will first hear about the experiences of the Misak and how through their Plan de Vida, they successfully reclaimed their ancestral land, their futures and their culture against all odds. Space will also be given to Peruvian Amazonian indigenous participants, who are championing the self-declaration of indigenous territories as Autonomous Territorial Governments, to share their experiences. Facilitated and guided by Misak participants, the group will then construct their own collective, fictional, Plan de Vida, going through the steps noted to conceive, create and implement the approach at a community level. Practical learning will be complemented by activities that will examine how indigenous governance models such as Plan de Vida can feed into global movements and efforts to protect the commons. A special focus will be given to looking at how the experiences of Plan de Vida and Autonomous Territorial Governments in Peru complement and could feed into one another, especially appropriate as Plan de Vida is gaining in interest from indigenous peoples in Peru.

## SESSION 7-O

### MULTI-STAKEHOLDER DIALOGUE

#### La buena gobernanza urbana basada en evidencia

Wednesday July 3

Room: 502

Una buena política pública está formulada en base a evidencia que permite conocer el diagnóstico sobre una problemática en un contexto específico. A pesar de que existe información sobre temas urbanos, muchas veces la data no está actualizada, su lenguaje es muy especializado o incluso de difícil acceso para un usuario común. Este conocimiento constituye un bien común y un derecho fundamental de la ciudadanía para poder hacer un monitoreo adecuado de las acciones y políticas que implementan sus autoridades para mejorar su calidad de vida. Adicionalmente, muchos gobiernos locales o instituciones públicas no cuentan con una visión de una ciudad sostenible ni de los enfoques a partir de los cuales desarrollar políticas urbanas centradas en la persona. En ese sentido, iniciativas como Lima Cómo Vamos, que monitorea la calidad de vida urbana de forma constante a través de la información que genera y recopila, constituye un aporte valioso para la generación de políticas públicas basadas en evidencia. Asimismo, Lima Cómo Vamos realiza el análisis de la información usando enfoques centrados en la persona y que contribuyen a la construcción de una ciudad más humana, justa y sostenible. Esta información es elaborada en un lenguaje no especializado como parte de un proceso democratizador del conocimiento y es compartida a través de diferentes mecanismos con funcionarios públicos y tomadores de decisión, periodistas y líderes de opinión, académicos, empresarios y ciudadanos. De esta forma, se logra incorporar en la agenda pública conversaciones en torno a las prioridades de la capital como la necesidad de la planificación de la ciudad, la seguridad ciudadana o la movilidad y transporte público. En este sentido, la discusión del panel se centrará en la relevancia y la necesidad de conocimiento urbano democratizado y articulado para una buena gobernanza de la ciudad, tomando en cuenta la participación activa de la ciudadanía. Algunas preguntas que darán pie a la conversación, son ¿de qué manera el conocimiento que desarrolla la academia puede incidir de manera más directa en la gobernanza de la ciudad?, ¿cómo promover una ciudadanía más activa, informada y comprometida en los procesos urbanos que se están llevando a cabo?, ¿qué acciones se necesitan para que los gobiernos públicos puedan promover políticas de gobierno abierto y transparente?.

Como parte del panel, estarán participando Caroline Gibu, Directora Ejecutiva de Ciudadanos al Día; Guiselle Romero, Coordinadora de Gestión Pública de la Pontificia Universidad Católica del Perú; Fabrizio Ricalde, Coordinador del Instituto Integración; Pablo Vega Centeno, docente e investigador de temas urbanos de la Pontificia Universidad Católica del Perú y Mariana Alegre, Directora de Lima Cómo Vamos.

## SESSION 8-N

# MULTI-STAKEHOLDER DIALOGUE

### Perspectives on challenges facing small-scale fisheries

Wednesday July 3

Room: 706

It is generally agreed in academic circles that it is challenging for policies to achieve multiple goals. In this context, the Voluntary Guidelines for Securing Sustainable Small-Scale Fisheries in the Context of Food Security and Poverty Eradication (hereafter SSF Guidelines) present an intriguing case of an internationally-negotiated framework promoting the achievement of social, economic, and environmental outcomes under a human rights based approach. The SSF Guidelines constitute the only global "soft law" representing the interests of small-scale fishers, who employ around 97% of the fishing labor globally, half of them women. Small-scale fisheries in developing countries produce almost as much fish for direct domestic consumption as large-scale fisheries, and most of this is consumed locally in rural settings where poverty rates are high and quality nutrition is sorely needed. Given the importance of small-scale fisheries globally and the pressures fishers face to avoid poverty, ensure food security and contribute to environmental conservation. In this dialogue we invited different stakeholders representing government, academia/traditional community-organization, a national human rights commission, and Food and Agriculture Organization (FAO) of the United Nations to share their experiences and perspectives on how the principles of the SSF Guidelines can contribute (or not) to balance social, environmental and economic outcomes. This dialogue will be organized as a roundtable discussion, where the moderator will ask presenters to structure brief presentations around the concrete question of: how they see, based in their own experiences, SSF Guidelines contribute (or not) to balance social, environmental and economic outcomes. At the end the moderator will synthesize the discussion with the help of all participants, in turn the synthesis will inform FAO's current efforts to support countries' implementation of the SSF Guidelines.

# MULTI-STAKEHOLDER DIALOGUE

## Recovering Technologies for the Management of the Commons in the Andes: A Multi-Stakeholder Dialogue

Wednesday July 3

Room: 602

The Mountain Institute Andean Program in Peru proposes a multi-stakeholder dialogue group in cooperation with members of RETAMA, a nascent network of peasant communities and grassroots organizations dedicated to the restoration of indigenous water technologies and the management ("crianza") of water in the high-Andes. These communities are responding to increased insecurity in water supply at high-altitude locations where glaciers are receding fast or have been already lost. They are responding individually and collectively to these pressures through the exchange of experience, articulation of their own perspectives through meetings and promoting public awareness of severe environmental tensions they are facing as a result of accelerated recession of glaciers and other climate change impacts in high mountain areas. RETAMA is currently composed of communities from Ancash, Lima, Ayacucho and Junín. In addition to the Mountain Institute, an organization dedicated to conservation, community development and cultural affirmation of mountain regions, other stakeholders participating in the network include PUNKU, archaeologists working in the interphase with local development; SERNANP, Peru's National System of Protected Areas, through the Nor-Yauyos Cochabamba Landscape Reserve; and local government authorities.

The format of the multi-stakeholder dialogue will be a round-table composed by leaders of the communities, representatives of public agency SERNANP, and non-profits represented by The Mountain Institute. The audience will include also academicians and practitioners participating at the 17th IASC Global Conference.

The aims of the multi-stakeholder dialogue are:

- Explore conceptual and practical aspects of the community-led network RETAMA, which is in formation.
- Discuss some of the main challenges about the management of common goods in relation to the RETAMA initiative, in particular the nature of the communal organization in the Andean context and the factors that enhance or limit the effectiveness of these collective institutions to lead actions of restoration or recovery of technologies for the management of common resources such as water.

# Ostrom Film Festival

## 'Pacificum, el retorno al océano' (2017)

Film Director: Mariana Tschudi

Wednesday, July 03, 13:30 - 15:30, Auditorium of the Faculty of Humanities, PUCP.

At the beginning of the 21st century, four scientists and specialists who love the sea decide to undertake several trips along the Peruvian Pacific coast through an aerial, terrestrial and underwater in order to show the intimate relationship that our country has had, has and will have with the sea and marine species. This documentary aims to show us the ancient relationship of respect and devotion of the ancient Peruvian settlers with their marine environment, allowing us to understand the value of the evolutionary history of our ocean that is still alive in some landscapes of the desert coast of Peru.

# Ostrom Film Festival

## 'Actual World, Possible Future. The Lives and Work of Elinor and Vincent Ostrom' (2014)

Film Director: Barbara Allen

Wednesday, July 03, 15:30 - 17:00, Auditorium of the Faculty of Humanities, PUCP. We will have the participation and comments of the director Barbara Allen, Carleton College.

This documentary shows the history behind the Ostroms' work on self-governance. Speakers from around the world tell how the Ostroms' ideas and practical principles have affected our thinking about the commons.

This project on Vincent and Elinor Ostrom, began in 2005 when Elinor encouraged Allen to edit Vincent's unpublished writings, resulting eventually in two books. She spent several weeks interviewing Vincent in their cabin on Manitoulin Island in Lake Huron, which they had built by hand. The next year Allen created a film tribute to Vincent, which led to the idea for a longer film about their work together. The project proceeded in small spurts, gaining greater magnitude when Elinor won the Nobel Prize, until 2011 when Elinor was diagnosed with cancer.

## SESSION 10-N

# MULTI-STAKEHOLDER DIALOGUE

## Multistakeholder Dialogue for Strengthening Common Pool Genetic Resource Governance I

Friday July 5

Room: 705

In the face of an unprecedented and irreversible global loss of agrobiodiversity, facilitating improved governance of common pool genetic resources has become an increasing priority in many countries, including mega-diverse ones such as Peru. While the importance of the conservation and sustainable use of genetic resources features prominently in many country's international commitments under the Convention on Biological Diversity and the International Treaty on Plant Genetic Resources for Food and Agriculture, as well as in their national legislation, putting such regulatory frameworks into practice represents an on-going challenge. Specific challenges relate to, inter alia, prioritisation, conservation target setting, establishing farmer conservation incentive mechanisms, accounting for social equity concerns, accessing threatened seed varieties, monitoring, facilitating value chain development, promoting public food procurement and consumption strategies that are compatible with the maintenance of the valuable underlying genetic resource base, and ensuring adequate regulatory frameworks and sources of long-term funding. Addressing such challenges requires the establishment of, and engagement with, a wide-ranging community of practice comprising, inter alia, farmers and their organisations, NGOs, extension agencies, universities, genebanks, local and provincial governments, Ministries of Environment, Economy and Agriculture, private sector entities, international agencies, etc.

The objective of the proposed Multistakeholder Dialogue is to identify the key opportunities and challenges to upscaling, based on the successful small-scale applications in Peru, Ecuador, Guatemala, Bolivia, Zambia, India and Nepal of Payments for Agrobiodiversity Conservation Services (PACS, ReSCA in Spanish) incentive mechanism platforms. These have been shown to provide a set of decision-support tools capable of promoting the cost-effective and socially equitable conservation of agrobiodiversity and its sustainable use.

The aim of the proposed Multistakeholder Dialogue is to enhance common pool genetic resources governance capacities through the formation of a closer-knit PACS community of practice capable of supporting a coordinated and strategic action plan for upscaling to the 20 priority crops that were recently identified at an expert workshop organised by the Ministry of Environment, Peru and Bioversity International. Prioritization was based on a ranking of crops important for food security and climate change adaptation (amongst other factors), while having high degrees of threatened infra-specific diversity.

## SESSION 10-0

### MULTI-STAKEHOLDER DIALOGUE

Multistakeholder Dialogue on community consultation and free, prior and informed consent (Spanish)

Friday July 5

Room: 602

“Land governance” and “supply chain governance” have taken center stage in global development discourse and practice, with widespread support from international financial institutions, governments, the private sector and civil society. Respect for human rights and land rights have emerged as key principles, and detailed procedural guidelines for community consultation in the context of investment, land acquisition and supply chain governance are key instruments through which these aims are to be advanced (as a complement to national legal frameworks). The globally-recognized “gold standard” for community consultation is Free, Prior and Informed Consent (FAO 2013), yet in practice, many governments and market-based governance instruments have operationalized these aims through a focus on “community consultation” rather than consent.

Peru is no exception. Despite the constitutional status there of international human rights treaties, such as the American Convention on Human Rights and Convention 169 of the International Labour Organisation concerning Indigenous and Tribal Peoples (ILO 169), and an extensively-developed jurisprudence from the Inter-American Court of Human Rights concerning Indigenous Peoples’ right to FPIC, Peru’s Law of Prior Consultation (Ley 29785, known as the ley de consulta previa), used the language of consultation rather than consent and employed a narrow definition of indigenous, which has been contested through litigation (Salmón 2013). Furthermore, its subsequent application has shown an emphatic ignorance over the obligation to obtain consent. Peru is thus well-positioned to shed light on debates surrounding FPIC and procedural interpretations of rights.

This multi-stakeholder roundtable brings together academics, government organizations (Defensoria del Pueblo, Ministry of Culture), representatives of Peruvian indigenous organizations (Asociación Interétnica de Desarrollo de la Selva Peruana) and indigenous peoples involved in consultation processes and related lawsuits, as well as NGOs on the frontlines of indigenous rights struggles (Forest Peoples Programme, Instituto de Defensa Legal), to debate the role of FPIC and community consultations in land and supply chain governance. The dialogue will attempt to link global frameworks and conversations (academic and non-academic) with the specifics of the prior consultation law and rights protections in the Peruvian context. The session will begin with short presentations by panelists to set the stage for the dialogue, followed by an open discussion. The overarching question to be explored by the event is, “To what extent do consultations and/or consent have the potential to be effective instruments for indigenous and community rights protections?” Some of the topics to be explored include:

- The state of play regarding FPIC/consultation recognition and implementation globally
- The state of play regarding FPIC/consultation recognition and implementation in Peru:
- Peru’s consulta previa law: protections it confers and does not confer, how it translates into practice

# MULTI-STAKEHOLDER DIALOGUE

## Multistakeholder Dialogue for Strengthening Common Pool Genetic Resource Governance II

Friday July 5

Room: 706

In the face of an unprecedented and irreversible global loss of agrobiodiversity, facilitating improved governance of common pool genetic resources has become an increasing priority in many countries, including mega-diverse ones such as Peru. While the importance of the conservation and sustainable use of genetic resources features prominently in many country's international commitments under the Convention on Biological Diversity and the International Treaty on Plant Genetic Resources for Food and Agriculture, as well as in their national legislation, putting such regulatory frameworks into practice represents an on-going challenge. Specific challenges relate to, inter alia, prioritisation, conservation target setting, establishing farmer conservation incentive mechanisms, accounting for social equity concerns, accessing threatened seed varieties, monitoring, facilitating value chain development, promoting public food procurement and consumption strategies that are compatible with the maintenance of the valuable underlying genetic resource base, and ensuring adequate regulatory frameworks and sources of long-term funding. Addressing such challenges requires the establishment of, and engagement with, a wide-ranging community of practice comprising, inter alia, farmers and their organisations, NGOs, extension agencies, universities, genebanks, local and provincial governments, Ministries of Environment, Economy and Agriculture, private sector entities, international agencies, etc.

The objective of the proposed Multistakeholder Dialogue is to identify the key opportunities and challenges to upscaling, based on the successful small-scale applications in Peru, Ecuador, Guatemala, Bolivia, Zambia, India and Nepal of Payments for Agrobiodiversity Conservation Services (PACS, ReSCA in Spanish) incentive mechanism platforms. These have been shown to provide a set of decision-support tools capable of promoting the cost-effective and socially equitable conservation of agrobiodiversity and its sustainable use.

The aim of the proposed Multistakeholder Dialogue is to enhance common pool genetic resources governance capacities through the formation of a closer-knit PACS community of practice capable of supporting a coordinated and strategic action plan for upscaling to the 20 priority crops that were recently identified at an expert workshop organised by the Ministry of Environment, Peru and Bioversity International. Prioritization was based on a ranking of crops important for food security and climate change adaptation (amongst other factors), while having high degrees of threatened infra-specific diversity.

## SESSION 11-O

### MULTI-STAKEHOLDER DIALOGUE

#### Improving comparative research for multilevel polycentric resource systems

Friday July 5

Room: 602

This multi-stakeholder dialogue proposes to develop CPR variables related to system boundaries, externalities, cross-scale interactions, multi-functionality, and technological change. Additionally, we propose to build consensus around the variables through "Coding the Commons Wiki".

Coding manuals, rooted in common pool resource frameworks, have provided the basis for CPR comparative research and have led to significant conceptual advances (Poteete, Janssen, and Ostrom, 2010). An effort by a diverse group of researchers mapped variables from the Institutional Analysis and Development Framework (IADF) to the recently proposed Coupled Infrastructure Systems Framework (CISF) with the aim of improving the comparative power of analysis for more complex multi-level and multi-scale resource systems associated with many of present day resource dilemmas. In the process they create Coding the Commons Wiki for sharing and updating variables stemming from the IADF and identified a nod to modify or create new coding variables related to the concepts of system boundaries, externalities, cross-scale interactions, multi-functionality, and technological change (Bernstein et al, In press) This multi-stakeholder dialogue aims to bring together researchers and practitioners from diverse fields to identify and develop variables related to these categories that can improve the basis for comparative research for multilevel and polycentric resource systems.

## SESSION 12-N

### MULTI-STAKEHOLDER DIALOGUE

The Lens of the Commons: experiences and reflections from a southern perspective / A Lente do Comum: experiências e reflexões desde uma perspectiva do sul

Friday July 5

Room: 706

O objetivo deste ciclo de debates será olhar para o conceito de comum a partir de diferentes perspectivas, convocando para isso pesquisadores e ativistas que têm proposto leituras e ações baseadas nos bens comuns desde uma epistemologia do sul. Sul aqui entendido como um sul geopolítico e descolonial, misturando referências e autoras em perspectivas de gênero, raça e de movimentos sociais. A primeira parte irá focar o conceito de Comum, convocando para isso ativistas-pesquisadores que estão desenvolvendo essa temática em seus trabalhos atuais, estabelecendo um diálogo com as questões cultural-ambiental, de gênero e racial. A segunda parte será dedicada a escutar a histórias de interdependência. Entre as pessoas, as pessoas e os recursos, os seres humanos e o planeta, a cultura e a natureza. E por fim, numa perspectiva do comum praticado pelos povos originários, discutir os debates e práticas atuais sob a perspectiva dos indígenas brasileiros.

## SESSION 12-0

# MULTI-STAKEHOLDER DIALOGUE

## Defending Community Waters: Legal Tools for Protecting the Freshwater Rights of Indigenous Peoples, and Local Communities, and Rural Women

Friday July 5

Room: 602

The equitable governance of water, land, and forest resources is essential for the achievement of the Sustainable Development Goals, including those related to poverty eradication, food security, health, peace and stability, economic advancement and sustainable livelihoods, and the conservation of biodiversity and ecosystems. These objectives are of heightened importance for the world's Indigenous Peoples and local communities, who rely on forests, water, and other natural resources for their subsistence, livelihoods, and culture. Despite the interdependence of land and freshwater systems, terrestrial and freshwater resources are frequently regulated and governed in isolation. Natural resource legislation consequently lacks the level of harmonization necessary to ensure communities' water security, and the extent of communities' legally recognized water rights are often unknown by a range of pertinent stakeholders-including communities themselves. As a result, communities are often ill-equipped to defend their rights when their freshwater resources are threatened, and to benefit from water-related investments impacting their territories.

This multi-stakeholder dialogue will explore solutions for securing Indigenous Peoples' and local communities' rights to freshwater, with an emphasis on strategies that address the nexus between communities' rights to use and govern water, forests, and lands. Panelist presentations will be followed by a participatory, solutions-oriented discussion in which both audience members and panelists exchange good practices and lessons learned from their respective countries and regions for securing communities' freshwater rights.

# Keynote Lecture & Closing ceremony

## BRIGITTE BAPTISTE

(Instituto de Investigación de Recursos Biológicos Alexander von Humboldt, Colombia)

### **Manejo compartido de la biodiversidad y los servicios ecosistémicos.**

Friday July 05, 18:30-21:00  
Huaca Mateo Salado

Dr. Brigitte Baptiste is biologist from the Pontificia Universidad Javeriana, Bogotá and M.Sc. in Latin American Studies from the University of Florida. She worked as a researcher at the Unit for Rural Studies from the Faculty of Economics of the Pontificia Universidad Javeriana, where she began her teaching career at the Program of Rural Development and Environmental Management. She participated in many national conservation projects and worked in diverse disciplines, such as environmental planning, cultural landscapes, process analysis of the transformation of the territory, the ecological and economic history of productive systems, multicultural use and management of biodiversity analysis, biocomplexity, biospeleology and biopolitics.

Since January 2011 Dr. Baptiste is the General Director of the Instituto de Investigación de Recursos Biológicos Alexander von Humboldt. Additionally, she is representing Latin America as a member of the multidisciplinary panel of experts IPBES (MEP / IPBES) since 2015 for three years.

#### **MODERATOR:**

Juan Camilo Cardenas, Universidad de los Andes, Colombia

#### **ROUNDTABLE: "DIALOGOS PARA LA SOSTENIBILIDAD"**

Lucía Ruiz Ostoic, Minister of the Environment of Peru

Manuel Pulgar-Vidal Otárola, Head of climate and energy, WWF International.

Marco Janssen, President of IASC

#### **Closing words by**

Salvador Alejandro Jorge del Solar Labarthe - President of the Council of Ministers of Peru

All registered participants are invited to attend the IASC 2019 Closing Ceremony, opened by the Keynote Lecture presented by Brigitte Baptiste. This event will be followed by cocktails. Do note that transportation will be available for all interested participants from the PUCP to Huaca Mateo Salado. The departure will leave the Faculty of Sciences parking lot from 18:00 - 18:15

# Practical Information

The Pontifical Catholic University of Peru - PUCP, welcomes you to the XVII IASC Biennial Conference: In defense of the Common Goods: Challenge, Innovation and Action; to be carried out from 01 to 05 July 2019 in Lima, Peru. Below Below you will find some practical info regarding your stay at the conference and in Lima.

In case of additional questions, do not hesitate to contact one of our staff members. We will be happy to help you!

## Venues

See next page

## Registration, Materials And Sessions

There will be hosts in the principal entrance of the PUCP to guide you to the sign in place.

The registration will take place in the Auditorium of Law School (D) on Monday July 01 from 8:00 AM to 09:45 AM, right before the Opening Ceremony that will be held in the same venue. After that, registration will take place in the room A100 (B) from 10:30 – 17:00.

## Internet (Wi-Fi)

Network: redpucp  
Password: C9AA28BA93

## Transport

It is recommended to use the hotel's transportation service for greater safety and comfort. If you want to take other types of services, you can download the following options from your Play store or App store: Satellite Taxi, Easy Taxy, Uber or Taxi Beat.

You can also contact the following transportation services:  
Taxi Satelital: 355- 5555 | Taxi Aeropuerto: 993 584 616

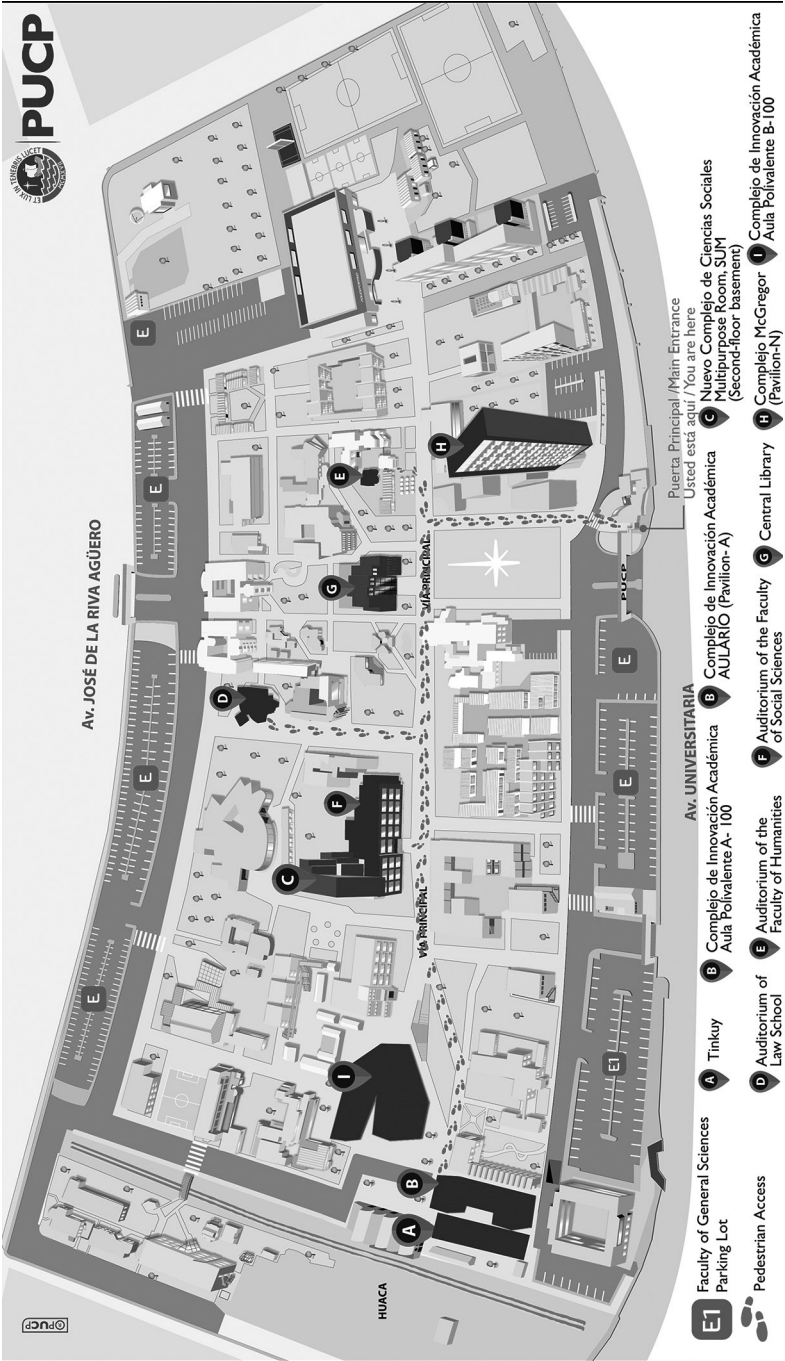

## Guided Transport

Every day (but Thursday) from 8:00 a.m. to 9:30 a.m., there will be a departure point from the CCPUCP (Av. Camino Real 1075, San Isidro) to the main conference Venue: PUCP.

University volunteers will be able to guide you on taking private transports (shared taxis) at the cost of each participant.

Additionally, transportation will be available for all interested participants to:

### **Opening Ceremony**

Departure from the PUCP\*: 6:00 – 6:15

Location: “Lugar de la Memoria, la Tolerancia y la Inclusión Social” (San Martín 151, Miraflores)

### **Conference Dinner**

Departure from the PUCP\*: 7:00 – 7:15

Location: Huaca Pucllana Restaurant (General Borgoño cdra.8, Huaca Pucllana - Miraflores)

### **Closing Reception**

Departure from the PUCP\*: 6:00 -6:15

Location: Mateo Salado Archaeological Site. (Its entrance is located in front of Jr. Bernardo O 'Higgins (ex- Andalusia), about 200 meters west of the Plaza de la Bandera, border of Pueblo Libre and Cercado de Lima)

\*Departure will be from the Faculty of General Sciences - PUCP parking lot

### **Lunch**

Below you will find a map of the cafeterias available within the PUCP campus:

All participants registered as speakers will receive tickets for lunches available in the designated cafeterias of the University. In addition, box-lunches will be distributed in the Tinkuy and Sala Uno.

### **Lodging**

We recommend checking the time of check-in and check-out of their respective hotels. Ask for the luggage custody service that the hotel provides free of charge.

Also, don't forget to coordinate with the hotel your transfer to the airport.

### **Weather**

The city of Lima currently has a humid climate with temperatures that range from 15 ° C to 18 ° C with frequent drizzles.

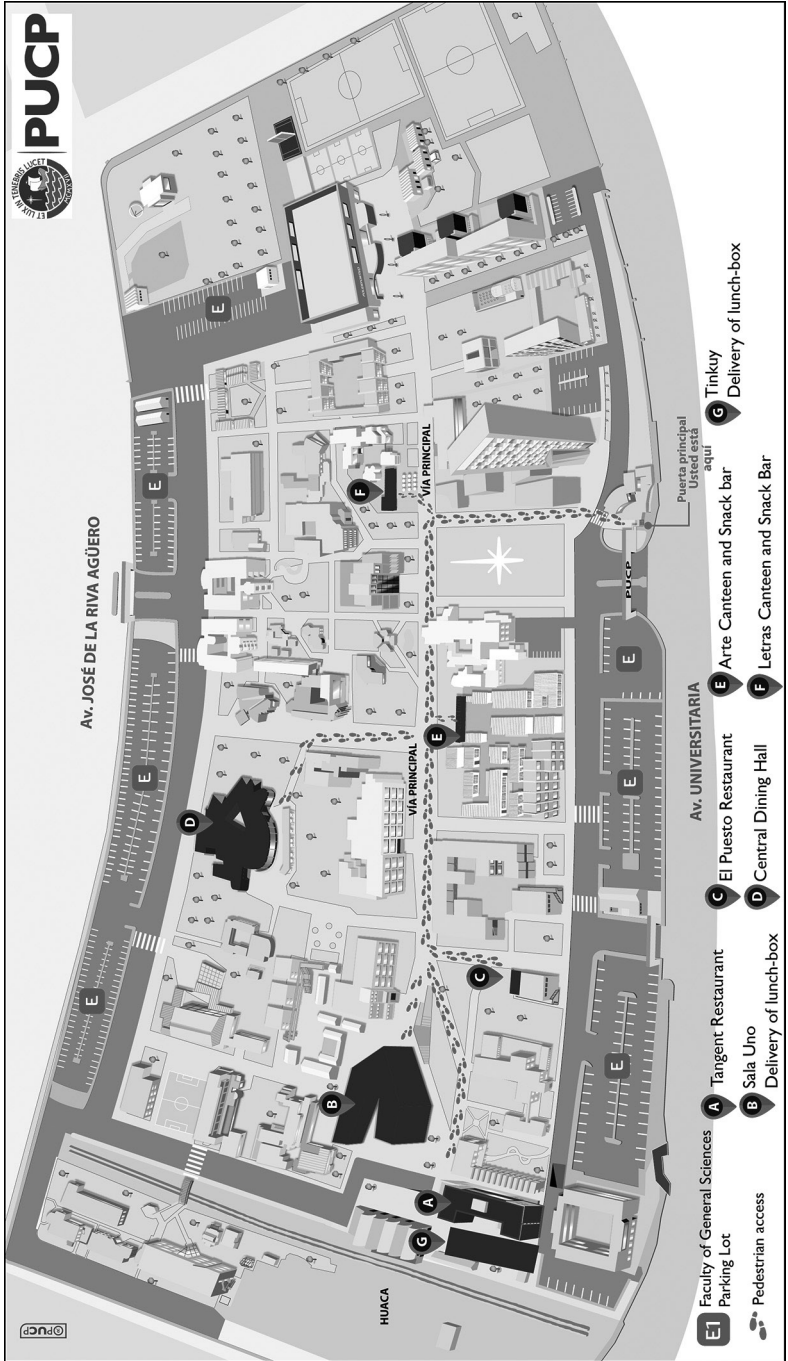

### **Outlets**

Peru uses 220 volts with a 60Hz AC power supply.

There are two types of power points in Peru: One accepts two-pronged plugs with flat parallel blades, while the other has plugs with two round plugs.

## Acknowledgments

The local organizing committee would like to thank and recognize the great labor that the International Association for the Study of the Commons has carried out throughout the years. We would like to especially thank the Association's Executive Board, led by IASC President Marco Janssen, for their guidance, time and continuous feedback throughout this year. We would like to thank John Powel, former President, who accompanied the beginning of this adventure. Rene van Weeren was an extremely valuable piece of the team and we are grateful for all his support and the time he dedicated to coordinating with Lima and Bogota.

We would also like to thank all the institutions that supported this initiative, reflecting their deep compromise with the sustainability of our region and our societies. This includes public Peruvian institutions such as the Proyecto Especial Bicentenario, CONCYTEC and the Ministries of Environment and Agriculture, and our international partners such as CIFOR, GIZ, UNDP, KAD, and the Hans Stiegel Foundation.

Thanks are also due to CISEPA and PUCP's Oficina de Eventos y Viajes for their hard work and commitment to undertake the organization this Conference to a very high standard. Finally, we would like to thank all the support staff and wonderful volunteers involved in the design of the conference, its excursions and pre-conference workshops. It has been a wonderful experience to take part in such an amazing Peruvian-Colombian team!
